The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into .residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. "I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? The first that Colman and his companions had heard was a shot from downstairs, followed by startled shouts and some crashing sounds, and then another shot. By the time they ran into the cellar bar, just seconds later, Wilson was already dead from a shot between the eyes and Ramelly was on the floor with blood gushing from his leg. Padawski and the others were standing uncertainly by the bar, covered by a .38 automatic that one of the young Chironian women was holding. Several other weapons had appeared around the room. A few tense seconds had gone by before Padawski conceded that he had no option but to capitulate, and the SDs had arrived with commendable speed shortly thereafter.. "Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." .and she laughed with strange delight.. Carson frowned and thought about the implications, then shook his head. "It's impossible," he said. "No system could work like that." Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. "Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk." "Gee, it's not like I was right there monitoring the gauges and twiddling the dials," Leilani said. The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter. "Believe in life after death?". "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." Colman nodded to himself and wiped his mouth with a napkin from the dispenser on the table while he tried to form the right answer. He was stuck in the Army but wanted to become a professional engineer; Jay could walk into being an engineer but thought he wanted to be in the Army. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. Hence the question probably concerned him more than anybody else. Kalens took a

moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. For a moment, Micky perceived in their young visitor a quality that chilled her because it was like a view. Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand. Stern shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." Sirocco tuned his head towards Hanlon. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assume a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. There was no time for smiles or reassuring gestures. Veronica put Celia's shoes on her feet and the flight-. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared..
