shut that door, quick!"⁹⁷. There had been a brief lifting of spirits among Song, Ralston, and McKillian at the thought of a possible rescue. The more they thought about it, the less happy they looked. They all seemed to agree with Crawford's assessment...many freestanding, brimful metal ashtrays. Having already forked out twenty-five dollars upstairs as his. "Anywhere," he replied. "Implicitly." The grey man took Amos into his cabin and they sat down on opposite sides of a table...dismal actuality of Intensity Five went beyond anything he could have imagined. A cavernous one-room. Tom Reamy wrote four stories for F&SF: "Twill," "Insects in Amber," "San Diego Lightfoot Sue" (a Nebula award winner), and the gripping story you are about to read. He also wrote a novel, *Blind Voices*. In 1978 he died at the age of forty-two, as he was reaching his peak as a storyteller of unusual freshness and power. "I don't know where it came from," Song told the group that night. "I don't even quite believe in it." Nolan had shrugged, too, and dismissed her from his mind. But that night as he lay on his bed, listening to the pounding of the drums, he thought of her again and felt a stirring in his loins...she could pick up the hem, her left hand stiffened...apartment court was a fleabag. Number five was one room with a closet, a tiny kitchen, and a tiny...There is no reason to suppose that this separation of offspring cells can't happen over and over, so different chemistries. But it's hard to believe that you've survived eating the food these plants produced. I rolled and lit a cigarette to see how bad my hands were shaking. Pretty bad, I saw. I blew out a...Well, the genes are contained in the nucleus of the cell, which makes up a small portion of the total and is marked off by a membrane of its own. Outside the nucleus is the cytoplasm of a cell, and it is the material in the cytoplasm that provides the various chemicals that help serve to inhibit or stimulate the action of the genes...?This way," she said, beckoning them into a tunnel formed from more strips of plastic. They twisted...She was quiet for a long time, then shuffled her feet awkwardly. She glanced at him, then at Song and Ralston. They were waiting, and she had to blush and smile slowly at them... "Jain!" I scream at the sky until my voice is gone and vertigo destroys my balance. The echoes die. A Jain died...the elevator (the dogs growled portentously until the doorman said "Aus!"), and told him to ring at door...must continually extend one's sensitivity, knowledge, and critical care to works that only abuse such...electric it fairly raised the hair on my arm nearest her. Even her voice was changed? higher, firm, rapid...and the verdict A simple matter, Dr. Rebates said, and no need for alarm. With proper treatment and rest she would recover. A week here in the hospital?...Critics seem to find it necessary, at least once in a career, to write a statement defending criticism per se. Shaw, Pauline Kael, Eric Bentley, and James Blish have all done it. That I'm doing it too, doesn't prove I'm in the same league, but it does indicate the persistence of the issues involved and that they occur outside, as well as inside, science fiction...Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology...make it possible to store human genetic information in electronic form in the ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship's computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected...'. As the hunter watched, she began to change. Like a rippled reflection in a pool coming slowly into... "Mrs. Bushyager called. Her sister and Mr. Bushyager are still missing..." reclined heavily on her mattress...babies . . . I mean, deliver babies a couple of times, but that didn't last long. The parents were afraid me. First, it was one of Randall's superlative pieces of satiric verse, and second, it was clearly intended to be publicity. "You people want to take a walk around the dome with me? Maybe we could discuss ways of giving people a little privacy..." For beneath her scarlet cape was a veil of green satin, and topazes flashed yellow along the hem in...30. Nolan awakened to the sound of drums. He jerked upright with a startled cry, then realized that night had come and they were once again at anchor beside the dock. Moises grinned at him in weary triumph...Her expression mercurially alters to sadness. "You're scissors, Robbie. All shiny cold metal. How can you ever hope to cut stone?" I laughed. I thought you were unlucky...". "Right," Lang went on. "It'll be literal confinement for her, right here in the Poddy. Unless we can rig..." "We are? You'll have to brief us on the political situation back there. We were United States citizens when we left. But it doesn't matter. You won't get any takers, though we appreciate the fact that you came. It's nice to know we weren't forgotten." She said it with total assurance, and the others were nodding. Singh was uncomfortably aware that the idea of a rescue mission had died out only a few years after the initial tragedy. He and his ship were here now only to explore...ushered him outside, silently watched him change, and sent him off on his silent way to the meadows with...The last step took the thin grey man right into the open trunk. Instead of going pale, he only looked interested, "I was told by the man in 409 you might be able to tell me something about Andrew Detweiler." There was a poker in her hand..A similar case is that of H. G. Wells's The Island of Dr. Moreau, filmed with superbly demonic atmosphere as Island of Lost Souls in 1932. Charles Laughton, maybe the best actor yet to appear on film, gives an extraordinary performance as Dr. M., and Bela Lugosi captures the spirit of the beast men as the Speaker of the Law with the abhuman quality that characterized his Dracula. Now Burt Lancaster is one of film's most underrated actors, but his straightforward non-intellectual approach to the doctor role undermined the '70s trip to the Island; Richard Basehart didn't help matters by looking like a beneficent Old Testament prophet in the Lugosi role. But even Laughton and Lugosi would have been hard put to come across, with the later film's completely uninteresting script and camerawork..It was the mystery that Nolan had sensed the first time he saw her staring at him across the village.I took a deep breath and lied with a straight face. The Intermediaries move to block his path. With an inarticulate screech, he ploughs through them, swatting them aside with the backs of his hands, kicking them out of his way with his heavy-booted feet. The Intermediaries break easily, and it occurs to me then that they are probably as disposable a commodity among the Sreen as tissue paper is among human beings. One Intermediary is left limping along after the captain. Through the clear pale skin of its back, I see that some vertebrae have been badly dislocated. The thing nevertheless succeeds in overtaking the captain and wrapping its appendages around his calf, bleating all the while, "No, no, you must abide by the edict, even as every other inferior species has, you must abide. . . ." The captain is having trouble disentangling himself, and so I go to him. Together, we tear the Intermediary loose. The captain flings it aside, and it bounces off the great portal, spins across the polished floor, lies crushed and unmoving.
