

ALEX IM GLUCK

a hot bath..With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swley and Stanislau were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..as heartworm, but I guess it's a perfectly respectable parasite. Anyway, I assure you with all.Sterm's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and far an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane. He shivered involuntarily. Beside him Celia gripped his arm. "General," Sterm ordered. "Launch the missile in sixty seconds." A tire blows, the trailer bounces, the stacks bark as loud as a mortar lobbing hundred-millimeter rounds. The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislau stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked..The major met his eye firmly. "But the risk of Sterm trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others.. "Good pup," the boy whispers..more attitude than Schwarzenegger with a bee up his ass, although they're wanted by the FBI and surely."That may be, but it's beside the point that I was trying to make," Merrick said. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn"..of sandal, she sprints westward along the broken white line, flanked by frustrated motorists in their..The video had been silent. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for.. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve.. "You don't know where you were born?". Geneva brightened. Selling drugs, doing drugs, violent just for the thrill of it, mixed up.THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..from her TV show."Earlier Noah had loaded the tape in the VCR. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects."Marie, who had been exploring the house, emerged from the elevator. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? I think it might go through to where the .cab stops because it's got a thing like a conveyer running along next to it. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise.."It could be worse, I guess," the girl said with a calculated jauntiness. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner

window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?.
