In the Hall of the Martian Kings by John Varley. You squirm around, raising the viewer to aim it down the hill. As you turn the knob with your thumb, the bright image races toward you, trees hurling themselves into red darkness and vanishing, then the houses in the compound, and now you see Bruce standing beside the corral, looking into his viewer, slowly turning. His back is to you; you know you are safe, and you sit up. A jay passes with a whirl of wings, settles on a branch. With your own eyes now you can see Bruce, only a dot of blue beyond the gray shake walls of the houses. In the viewer, he is turning toward you, and you duck again. Another voice: "Children, come in and get washed for dinner now." "Aw, Aunt Ellie!" "Mom, we're playing hide and seek. Can't we just stay fifteen minutes more?" "Please, Aunt Ellie!" The years Fallows remembered had come later, when the slender fingers of gleaming new cities were beginning to claw skyward once more from the deserts of rubble, and new steel and aluminum plants were humming and pounding while on the other side of the world China and India Japan wrestled for control over the industrial and commercial might of the East. Those had been stirring years, vibrant years, inspiring years. Fallows remembered the floodlit parades in Washington on the Fourth of July—the color and the splendor of the massed bands, the columns of marching soldiers with uniforms glittering and flags flying, the anthems and hymns rising on the voices of tens of thousands packed into Capitol Square, where the famous building had once stood. He remembered strutting into a high-school ball in his just acquired uniform of the American New Order Youth Corps and pretending haughtily not to notice the admiring looks following him wherever he went. However, when you made your attack, I was safely docked at a base star and thus protected by its powerful energy screens. Your attack succeeded only in wiping out the remnants of your own forces. "Will you pipe down in there," called the jailor without opening his eyes. "I think I can answer that," McKulian said. "These organisms barely scrape by in the best of times. The ones that have made it waste nothing. It stands to reason that any really ancient deposits of crude oil would have been exhausted in only a few of these cycles.
