During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product..of air fosters the dry sound of a long-dead sea..Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting..came at hand; half measures were fatal. The shorter-term price to be paid was regrettable, but when had Nature ever offered free lunches? And in the longer term, what did it mean anyway? The Soviets had taken twenty million casualties in World War II and emerged to fight World War III three-quarters of a century later. And in that conflict the U.S. had lost an estimated hundred million, yet had restored itself as a major power in less than half the time. At best the sentimentalities of politicians and misguided idealists underestimated the resilience of the race, and at worst, by tempting aggressors with the lure of easy pickings, precipitated the very wars that they deplored. Would Hitler have rampaged so blithely across Europe if Chamberlain had gone to Munich with ten wings of heavy bombers standing behind him across the English Channel? The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones—the ones who were wearing suits—could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded. "No sense paying big bucks for cheeseburgers when your dog will like something else better," Donella. "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. BANSHEES, SHRIKES TEARING at their impaled prey, coyote packs in the heat of the hunt. He had been less generous with the small bag of potato chips. They were crisp and so delicious that he. EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded. "Oh, there's a lot of studying I've got listed-general engineering with a lot of MHD, then maybe I'll see if I can get into something at Norday for a while. Later on I might move out to the new place they're talking about." "Of course it is.", Jay sighed wearily. "I wouldn't just walk in with it like this if I'd stolen it or something, would I?" Bernard was watching with interest over Stanislav's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious. Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say. "Ah, but think of the honor of it," Hanlon told them. "And won't every one of them poor SD fellas back in the shuttle be eating his heart out with envy and just wishing he could be out there with the same opportunity to risk himself for flag and country." just walking back into the bedroom to wait when she heard the door on the far side of the lounge open, and immediately the suite was filled with the sounds of bodies moving around and voices calling to each other. A few seconds later Colman appeared in the doorway from the lounge. Celia started to move toward him instinctively, but he checked her by throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass." Helicopter rotors. parched. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened. "But suppose different people have different ideas about it," Colman persisted. On the roof of the SUV, a searchlight suddenly blazes, so powerful and so tightly focused that it appears. "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." quick enough to spare her from a bite. She might have imagined the thin hiss as the

thwarted snake sailed.Maybe something hideous does lurk in there. Perhaps awaiting Curtis is a discovery far more disgusting."Shirley? You mean Ci's mother?".The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion-was a new one. "I'm not all that sure what you mean. The people who work here, I guess.".are tall, made taller by their Stetsons. Both wear their blue jeans tucked into their cowboy boots..Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him-apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?". "RAPE" Ha-ha, hah-hah.guard, as well..But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other..Old Sinsemilla would never intentionally kill herself. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." He paused and continued staring at the wall. "You're an engineer, and she runs part of a fusion complex. If you want out, you've got a place to go. That's what she's telling you.".
