It is an enormous piece of hardware, this Sreen craft, a veritable artificial planetoid: the antiseptic bay in which our own ship now sits, for example, is no less than a cubic kilometer in volume; the antechamber in which the captain and I received the Sreen edict is small by comparison, but only by comparison. Before us is a great door of dully gleaming gray metal, five or six meters high, approximately four wide. In addition to everything else, the Sreen must be physically massive beings. She smiled at them and said, "I am glad you have come for the second piece of the mirror, but it is buried in this frozen shard of ice. Once, when I was a girl, I chopped through a chunk of ice to get to an earring my mother bad dropped the night before in a winter dance. That block of ice was the coldest and hardest ice any man or woman had ever seen. This block is ten degrees colder. Can you chop through it?".Now one day in late spring, Brother Hart had gone as usual to the lowland meadows leaving Hinda at home. Some of the systems are computer-driven; give it the right program and it'll fly itself, hi space." She looked longingly at the controls, and Crawford realized that, like Weinstein, she didn't relish giving up the fun of flying to boss a gang of explorers. She was a former test pilot, and above all things she ioved flying. She patted an array of hand controls on her right side. There were more like them on the left..She nodded. He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them..Then he found his voice and cried out; cried out again as he saw the open window and the gray vacancy of the clearing beyond..Neither of us sleeps much the rest of the night.
