

## CHOPIN VU PAR MOI CONVERSAZIONI CON LUCIA LUSVARDI

The wizard who called himself Gelluk and the pirate who called himself King Losen had worked together for years, each supporting and increasing the other's power, each in the belief that the other was his servant. The Patterner came forward and took her hands in his. His hands were warm, and she felt so mortally cold that she came close up against him for the warmth of his body. They stood so for a while, her face turned from him but their hands joined and their bodies pressed close. At last she broke free, straightening herself, pushing back her lank wet hair. "Thank you," she said. "I was cold." "Oh, it's time, and past time. We must deliver the King. We must find the great lode. It is here; there is no doubt of that: "The womb of the Mother lies under Samory." "The great and mighty go their way unchecked. All the hope left in the world is in the people of no. He went on showing his wares and joking with the women and children. Nobody bought anything. They should come, he could not land on Roke," saw the whole plan now was folly. There was no way he could disguise her that would fool the. were not doing as much damage as the Kargs, and Maharion judged the urgent danger lay in the east. at the dock to take her, and the wind, I can tell you, will stand fair for Way." Otter, sitting by the fire shelling walnuts, held still. Mead thanked the messenger and brought him in for a cup of water and a handful of shelled nuts. She and Ayo chatted with him about his wife. He checked the henhouse, finding three eggs. Red Bucca was setting. Her eggs were about due to. When he got up at last, he wondered how old he was, and looked at his hands and arms to see if he was seventy. He still looked forty, though he felt seventy and moved like it, wincing. He got his clothes on, foul as they were from days and days of travel. There was a pair of shoes under the chair, worn but good, strong shoes, and a pair of knit wool stockings to go with them. He put the stockings on his battered feet and limped into the kitchen. Emer stood at the big sink, straining something heavy in a cloth. "He drinks because he drinks," she said. "With some, that's all it is. I'll be in the dairy, now. I'll lock the house door. There's... there's been strangers about. You rest yourself. It's bitter out." She wanted to be sure that he stayed indoors out of harm's way, and that nobody came harassing him. Later on she would go into the village, have a word with some of the sensible people, and put a stop to this rubbishy talk, if she could. Lebannen. In the doorkeeper's box, which was like a giant's overturned bathtub, sat a robot. "In the Inmost Sea, on the Isle of the Wise, on Roke Island, where all magery is taught, there are." "How do you know that?" "know. . ." "There was no place for him among the Masters, since a new Master Summoner had been chosen, a strong man in his prime, not likely to retire or die. Among the scholars and other teachers he had a place of honor, but he wasn't one of the Nine. He'd been passed over. Maybe it wasn't a good thing for him to stay there, always among wizards and mages, among boys learning wizardry, all of them craving power and more power, striving to be strongest. At any rate, as the years went on he became more and more aloof, pursuing his studies in his tower cell apart from others, teaching few students, speaking little. The Summoner would send gifted students to him, but many of the boys there scarcely knew of him. In this isolation he began to practice certain arts that are not well to practice and lead to no good thing. had laid on Losen's person and expeditions and forays, the prisoning spells he had laid on the. What he found on Roke was both less and more than the hope and rumor he had sought so long. Roke Island was, they told him, the heart of Earthsea. The first land Segoy raised from the waters in the beginning of time was bright Ea of the northern sea, and the second was Roke. That green hill, Roke Knoll, was founded deeper than all the islands. The trees he had seen, which seemed sometimes to be in one place on the isle and sometimes in another, were the oldest trees in the world, and the source and center of magic. "If he wants a party, he'll have it," she said. Their voices were alike, being in the higher. She looked him up and down. "Marks on it, sir," she said. And then, to Tern, in a different tone, "If you'd like to come with me, she lives this way. And though she's only a girl, and poor, I'll tell you, peddler, she has an open hand. Though perhaps not all of us do." asked them. over me, laughing, chattering, babbling. . . I was delivered by a sleep like death; in it, even time. He looked at her, that vivid, fierce, dark face in its rough cloud of hair. She wore only her. all the miles to Woodedge. All he said was "She saved me," and the carter asked no questions. looked at him kindly. "Now, what is forbidden to the summoner, or any wizard, is to call a living spirit. We can call to them, yes. We can send to them a voice or a presentment, a seeming, of ourself. But we do not summon them, in spirit or in flesh, to come to us. Only the dead may we summon. Only the shadows. You can see why this must be. To summon a living man is to have entire power over him, body and mind. No one, no matter how strong or wise or great, can rightly own and use another. "I was new at the business of being Archmage then. And younger than the man we fought, and maybe not afraid enough of him. It was all the two of us could do to hold our own against him, there in the silence, in the cell in the tower. Nobody else knew what

was going on. We fought. A long time we fought. And then it was over. He broke. Like a stick breaking. He was broken. But he fled away. The Summoner had spent a part of his strength for good, overcoming that blind will. And I didn't have the strength in me to stop the man when he fled, nor the wits to send anyone after him. And not a shred of power left in me to follow him with. So he got away from Roke. Clean gone..desire..the prenticing-fee. Except as an evil to be dreaded and shunned, magic plays no recognized part in their society. This inability or refusal to practice magic puts the Kargs at a disadvantage with the Archipelagans in almost every respect, which may explain why they have generally held themselves aloof from trade or any kind of interchange, other than piratical raids and invasions of the nearer islands of the South Reach and around the Gontish Sea.."When do we land?".heart of the teaching of magic..Master of Old Iria.
