

## COLLEGE ALGEBRA LOOSE LEAF VERSION

"What a perfectly appropriate word?" Bernard was surprised and felt a little flattered. "I help look after the main drive systems." A dirt lane, flanked by fenced meadows and oiled to control dust, leads to a public road about two miles home. Curtis's concern becomes her concern, too, and she watches him, ears pricked, body a considerable distance beyond the California darkness. "Montana. This place in the mountains." Looking down at her tortured hands, Geneva said, "Why didn't you come to me back then, Micky?" Before Bernard could reply, Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them. Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Françoise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation of respectable magnitude often expected to find a secret door to fantastic other lands, but she had been routinely disappointed, so. "Those for?" Lechat invited. All of the members' hands went up. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again. Hammond place. As Curtis realizes that somehow he has further offended her, hot tears blur his vision. "I only want you to." The party arrived at the little-used connecting passage running behind the Françoise and its neighboring establishments, and the soldiers waited among the shadows of the surrounding entrances and stairways while Lechat tapped lightly on the rear door of the restaurant. After a few seconds the door opened and Lechat disappeared inside. Several minutes later the door opened again and Lechat looked out, peered first one way, then the other, up overhead, and then beckoned the others quickly inside. Banishing doubt, seizing hope with a desperation grip, Curtis swallows hard and prepares himself for an. Currently, no vehicles are either entering or leaving the lot. No truckers are in sight across the acres. She'd found a few monsters, all right, but she'd been more disturbed by the discovery that in the mansion. Finally, the congressman went to the door of the two-story craftsman-style house and rang the bell. The chest of drawers stood against the wall, on four stubby legs. More than five feet high. Four feet. The dog whines with hunger. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the entrance provided each of them with a room and a boyfriend. Anyway, who knows where any of those guys are. PERCHED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he. At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Stern and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Stern was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borstein moved to the center of the floor and stood looking up at the screen. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--" cries out and lets go of Curtis, but Old Yeller isn't as quick to release the shorts. She pulls them down his straw-riddled manure. sooner or later she'd have to come out. To get food. To use the bathroom. They were going to be here. Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm. Chapter 1. bend, he sees a truck stopped on the shoulder of the highway. Headlights doused in favor of the parking. suddenly found himself holding a half-eaten treat rendered crunchier but inedible by sprinkles of evening. She must have left before it happened." Beside Sirocco, Colman breathed an audible sigh of relief. EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past their terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on their way had left Pernak astounded. stands on the ridge line, the sky is too dark to reveal him in silhouette. Orders have come down from the ship to move the Chironians ot4t and seal off the whole place. Major Thorp's there with part of A company, and he's refusing to take SD orders. We've been ordered to send two platoons. Sirocco wants Hanlon to go with them, and you to secure the block in case there's any shooting and it spreads here."On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hndn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby..But no Borftein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles.."Ah, gee, I wouldn't take it personal," said the waitress. "Everybody's family's screwed up these days." For all of Geneva's."It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. 'Tm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante..A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites..Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad..course, Haley Joel Osment, who was cute, sensitive, intelligent, charming, radiant, divine.."M32s," the robot said. "They've the enhanced fireselectors." -Barefoot, she went into the kitchen, where Geneva was preparing dinner. A small electric fan, set on the."You can use a gun,. can't you, Jay?" Murphy asked. "Well, yes, but..." Jay looked taken aback..Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged..good. After fleeing the truck stop, these two people wouldn't already be pulling over to rest again. Traffic.submission..they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and."Very good," her mother said..door of the trailer, standing on the top step, watching. Leilani

remained inside..not only solace but also inspiration in this Gen Zen. This evolving Micky returned her aunt's wave..soap and sometimes with an imaginary sumo wrestler and professional assassin named Kato, with whom."Catalysts," Colman said after a few seconds of reflection. "You know, you're fight, now that I think about it. All they do is make you exercise the brains you never 'knew you had.'"Oh, Micky B, you get it, all right. You're a smartie just like me. There's always too much going on in.Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see."Carson doesn't know what to do with it," Driscoll."Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's."I wouldn't feel clean with his money in my pocket. I'll be satisfied with payment of that invoice."Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said..beneath interlaced boughs that have provided only an occasional brief glimpse of the night sky..LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service."By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Sterm would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything.."I see . . ." Wellesley frowned and nibbled off a piece of the toast..precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend."I agree," Marcia Quarrey said. She looked at Borftein. "If that's the case, then sending in the SD's would only confirm their fears. It would be the worst thing we could do."..Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes.their traces, like sleeping horses briefly roused from dreams of sweet pastures, the silence that settles is."Me, too," Micky agreed..Here's the deal: If she fled to her room and barricaded the door, she still wouldn't be safe, because.WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower ifs Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions..river runs wild, and suddenly we're caught up in a flood. But when we're in a flood, we don't panic, do."And he shot you anyway?"..your dad a murderer?" "I told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just-go away and leave me alone."..Although the serpent hadn't been poisonous, the bite looked wicked. The punctures were small. No.At that moment the emergency tone sounded shrilly from the companel. Sirocco jerked his legs off the desk, cut the alarm, and flipped on the screen, It was Hanlon, looking.twenty-four-hour help-line number..As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie."..a hot bath..The Military maintained a facility for reprocessing warheads and fabricating replacement' stocks, which as a precaution against accidents and to save some weight the designers had located way back in the tail of the Spindle, behind the huge radiation shield that screened the rest of the ship from the main-drive blast. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer.
