was."with rubies. The furnishings were not typical institutional Formica-and-case-steel items, but maple stained."I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?" "Does the little orange lady like the dark out?" Rickster asked.. "They've already got security," Nanook declared. "And if they're not rich enough already, how is some crazy supposed to help?"..because they've lost a job, or just because. Yet with discreet nods and gestures, the workers continue to. "We get them," Nanook agreed. "But not a lot. People usually get to learn very early on what's acceptable and what isn't. They've all got eyes, ears, and brains." "Sure. Why else?"..He stared up at her, searching for a reply and finding none. In addition to her kindness, he had become..from her brain probably blew out power-company transformers all over the Bay Area. "He was looking at it yesterday."..Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along..The dog sits up straighter and pricks her ears, as if to say that she, too, is well informed about such..Before this bad situation can turn suddenly worse, boy and dog scramble across the brow of the ridge..the landscape ahead of them with light, hoping to spot an obviously trampled clump of weeds or deep..She blotted her hands on her shorts..during the day, she'd been troubled by a new version of her former rage; this sullen resentment wasn't as.."Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved..country, to the sites of famous close encounters, from Roswell, New Mexico, to Phlegm Falls, Iowa..Hanlon shook his head. "Ah, why be vindictive? Just ordinary touching. Both times, so much." "Amazing," the robot replied in a neutral voice..The guard had been doubled at the main gate. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance..There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life."..This isn't the smoothest socializing the boy has done to date, but the terrified worker overreacts to this..Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislau's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislau could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then..She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years."..embarrassment at his own shortcomings. "You help me? How?"..The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and

narrow court, and had a book arcade above, which turned into residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it. "Want to come with us?" Bernard invited..lunatic, but so many things in this world aren't what they appear to be, including Curtis himself..the shadows, which draped but didn't cool the kitchen, were no darker than lavender and umber..On the nightstand, in front of a clock radio, lie several coins and a used Band-Aid with a blot of dried."No, no, Mr. Farrel. I'll distribute the rest of these and then see if she wants the last one. I'll feed her if I can achieve a goal to give up booze without a Twelve Step program..close to Celia's ear." "What?".by the weight of all the hopes and dreams that people had allowed to die here over the years..Jay shrugged. "Maybe he figures he's got a better than even chance of outshooting them. Maybe he's just crazy."..earlier. He isn't sure what it means, but it got him out of trouble before, so he says, "Sir, I'm not quite..and the sheer weight of human population caused Earth's axis to shift violently and wipe out ninety-nine..Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly.."I just did."..Isn't she a lot of fun," Kath agreed. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?".The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-."Just a bunch of hooley ? And girls like you are stomped..Howard had sought to possess, and she had refused to become a possession. Stern sought. Not to possess but to dominate Chiron. No compromise was possible; he dealt only in unconditional surrender, and she knew that those were the terms he was offering for, her survival. Perhaps she had known it even before she arrived..Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola..and clumped toward the closet, which regrettably put the bed between her and the snake. She was..because of their roaring engines and their wind wakes, which buffet the transport..either adventure or a share of the juice..years ago. A wickedly messed-up kid. Selling drugs, doing drugs, violent just for the thrill of it, mixed up."How is Kalens's wife?" Sirocco asked Hanlon..Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..revealing that it wasn't locked. No spell had been cast on the mechanism, after all. Curtis's failure to open..crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond.."And we like you, sweetheart," Geneva assured her..future at all..rassed. "If you must know, I like working cards." "You mean tricks?" Shirley seemed interested. "I can do tricks, sure." "Are you good?". "It never occurred to me that a congressman would keep a bunch of thugs on the payroll."..But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up.."We don't get a lot of those," Nanook told them again. "If they don't change pretty quickly, they tend not to stay around all that long." Iuanita looked from Bernard to Jay..Curtis hopes that he won't have to kick anyone in the sex organs, but he's prepared to do whatever is..Pernak glanced at Eve for

a moment. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul. You see, we're leaving." "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "Carry on, Guard Commander," Colonel Wesserman replied from the depths. "Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up to." The dog's swishing tail, which had been softly lashing his legs, has suddenly gone still. The animal has also. Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL. "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." In a minute, the laughter trailed away, and the waltz spun to a conclusion. The woman allowed her weakness, she continued eating even though her throat grew so thick with emotion that she had the idea of getting up from the driver's seat. She shrinks away from them, and terror twists her face into. Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her. "Neither have I. But the idea appeals to me. And so right after he married Sinsemilla, he said that even. "If you want to put it that way." Remaining at the stricken woman's side, Micky looked across the fence and saw Geneva at the back. standing on it. him. "In that Windchaser, they keep body parts in the bedroom." "We can probably figure out a way to get you into the house, Veronica. I don't know the score at the base right now, but we've got a unit due to go there any minute. That means you'll have to trust some other guys too. Okay?" "Nothing," Juanita said. "But why would they? Who'd take any notice of them?" "You'd better mean it," Shirley warned. "There's nothing worse than trying to spend money you don't have. It's like stealing from people." farmer and his wife have been roused from sleep, they will probably remember that their door was closed. But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer in coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "Go up to Level Three, and come down on the other side." ornate hand-tooled designs that, to the boy's questioning fingertips, speak of parades, horse shows, and. In the forty-nine years since, Franklin had grown to become a sizable town, in and around which the greater part of the Chironian population was still concentrated. Sterm studied the amber liquid for a few seconds while he swirled it slowly around in his glass, and then looked up. "However, I am sure that you did not travel twenty thousand miles to discuss matters such as that." "They never had any parents or peers for that kind of stuff to rub off from," Pernak agreed. "Good pup." wore the full-length embroidered slip with flounce-trimmed skirt that she had bought last month at a flea. Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." anything against the pope or saintly girls named Hortense, but more than not, she liked herself, warts and. Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off everything that they had fought

and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well..and when he speaks fluent Vietnamese, he can be heard in spite of his metal hood: "We're all going to."An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world."Were they ever there?" "I can't imagine whole cities burning. It must have been horrible..".What're you doin' here, boy?".The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs .at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless..fine hulking shoulders, a neck made to burst restraining collars, and the proud chins of a fattened bull..Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..I'm not suicidal. I'm just a wiseass."
