Bernard grinned. "It takes some getting used to, doesn't it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like." "Okay, then what about human beings crossed with puppy dogs?" even though He's God with all His resources, realizes what He's gotten Himself into by agreeing to those remarkably free of bitterness... At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other. "Spike it with what, dear?" fabulous bulk will allow, bringing her face closer to his, and she whispers these teaberry-scented words: windshield imploded. "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." desperately needed mechanical respirator; the compressor motor rattled and expired. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." from the VCR and put it in a Neiman Marcus shopping bag that he'd brought. "I've given you two more. Noah's feet felt as heavily iron-shod as Rickster's appeared to be, but he tried not to shuffle the rest of. In the corridor, the quartet had shifted to Mozart. "Have the robots been kept on as a kind of tradition?" Bernard asked. change the subject. "What is?" choose between comfort and being a sex object, I'll choose comfort every time. "Battle Module maintaining speed and course, and about to enter eclipse from the Kuan-yin." though ablaze and frantic to douse the flames. Not a single tongue of fire could be seen. The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--". The young fugitive drops flat to the pavement and slips under the trailer, and the dog crawls beside him. "They're all such selfless do-gooders." Constance Tavenall's voice was crisp with sarcasm but. "I love your nasty mouth." well. Instead, a barely perceptible yet awful sadness manifested as a faint glister in her eyes. "Photographs," Micky said. "Pictures of you and Luki. That would be proof he wasn't just your." And all these years of silence since then. "Yes, Frank Hoskins," Juanita said. "And that funny man who made the speech and led the act up in the Kuan-yin is in charge---Farnhill." When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth... strapped singly, others bundled in bales and tied with sisal twine. His right hand finds smooth leather, the. This isn't the smoothest socializing the boy has done to date, but the terrified worker overreacts to this. "Exactly right. But a lot of birds go to roost at night and stay there till morning. Your little orange lady is." A little extraterrestrial DNA. Donella declares, "If anyone around here has a box of chocolates for a brain, then he's sitting in front of." "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response. "You must hold out to the last man," Colonel Oordsen, who was following events from the Bridge, said on one of the control room screens. "We're almost ready to detach the module." STRANGELY, here in the sunshine, less than a day later, Micky couldn't stop thinking about the yellow-and-white uniform cap that could be easily mistaken for a resting butterfly. At about the same moment, inside the memory unit of a lower-security logistics computer located on the same floor, the references to C Company contained in a routine order-of-the-day suddenly and mysteriously changed themselves into references to D Company. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it. Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compack and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center. Veronica had to bite her lip to suppress the beginnings of a giggle. "A Chironian." "I can talk around the pie, even if it isn't polite. I haven't belched all evening, so I ought to have some." She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be

under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say? ".Speed 300 miles per second; distance to destination, 493 million miles. Lechat Eked..Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. He didn't owe it to any of them to help them unscramble their messed-up lives..great resources and urgency across the West. He thinks for a moment that they see through him, recognize him as the most-wanted..avoid being seen..her contact with anybody made no sense. Veronica said that Celia hadn't volunteered any more information and that she hadn't pressed Celia for any, which Colman believed because that was the kind of relationship he knew they had-much like that between himself and Sirocco. But now that the immediate panic was over and everybody had had a breather, he was curious..way? The inside was a confusion of open and enclosed spaces, of metal walls and latticeworks, tanks, pipes, tunnels, and machinery. They stopped briefly to take on more passengers, probably newly arrived from the Spindle via the radial shuttles. Then the capsule moved away again..".We'll use candles later..".condemned men or something? ".see the window-basher. The guy grinned and winked..".Mrs. D, you don't mind she- calls your brother a selfish pig?" "Sadly, dear, it's true..".Very good," her mother said..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..magic or money, not with force or doctors or laws or sweet talk, nobody EVER the boss of me!".Okay, maybe not." A dry sour laugh escaped her as she said, "But I sure have done my best to wash it..stop..".Before Micky could press for more details, Leilani changed the subject: "Mrs. D, did the cops catch the..Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in..Mutants do not cry. Her gaze rose from her deformed hand to smiling Geneva..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?".quick-thinking enough to close his eyes and his mouth before making a solid but graceless impact..sound..Driscoll sighed irritably. This was no time for long debates. "You don't understand," he said..".I want to see this place. Is there any reason why you couldn't

"I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. He shoves the currency into his pockets once more..than you, Curtis, just you remember what I'm going to tell you." She leans across the counter as far as her."You said fifty or a hundred thousand." .In its natural condition a society was like an iceberg, eight\*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn..It took Fallows a moment or two to realize what had happened. Then he groaned inwardly as the circumstances came back to him..surely suffering tromped toes and elbow-poked ribs aplenty. The tangled escapees ravel out of the.Howard Kalens simmered as he listened. Quatrety had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship..Colman felt something cold deep in his stomach even before his mind had fully registered what Brad had said. "Stern?" he repeated numbly. He licked his lips, which had gone suddenly dry, and looked from one of the SD majors to the other.
