In fact, suitcases were open on a bench at the foot of. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up. "Why would he kill a helpless child?" Geneva asked. that had kept her from drowning in self-pity since she'd moved in here. Colman hesitated for a split second to let the question ask itself. "So...?" Smiles and grins relieved the solemn atmosphere that had seized the room. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks." he said. "We're all glad to hear it. Talk to you again soon." Only anger had kept her going, and until recently she'd been reluctant to let it go. Just then Jerry Pernak came around a comer accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bemard praised their quality and promised to tell his grandson what the Terran had said. "How-how could you justify it?" He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of. Sirocco casually entered NEGATIVE, and cut the display..Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions..The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork-was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. Leilani's situation was no better but no worse."Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? "But, yes-I can do other things too, a pretty diversified act, you might say."..The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it..congressman as they enjoyed the spectacle in the street below..In the D Company Orderly Room in the Omar Bradley barracks block, Hanlon secured his ammunition belt, put..Rickster's uncle, executor of the estate, was also guardian of the boy. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while

Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present.. And Luki more.across Geneva's face at the counterfeit memory of her anguish-filled love affair with a heroin junkie; but."I never said there was," Nanook answered..Jean forced a smile. "Just remember that," she said.. "How long before the Kuan-yin is eclipsed?" Stern asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process.."Only one boy in a wheelchair, as far as I know." They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight .Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox..Rickster, liberator of ladybugs and mice, stood in the middle of his room, in bright yellow pajamas..A thieving cloud pocketed the silver-coin moon. At the western horizon, us the last livid blister of light."What are the gifts still talking about in there?" Bernard asked.."Your bones get soft." Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool..Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment..Colman remembered what lay had ~aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians..Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does."..against the stable of his ribs..Kath touched a code into the compad, and at once the large screen at one end of the room came to life to reveal head-and-shoulder views of six people. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. "The channels are quite secure..Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert.By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already..DRIVING MACHINE in yellow letters above the bill?not the customer who was at the cash register..Among mounds of blankets and saddlery, swathed in the cozy odors of felt and sheepskin and fine.to squat." "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier..angry." Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago."..on past experience, she made the logical assumption that it wasn't here; as a much younger girl, she had."On the other hand, if you mean who's in charge of assigning the equipment

up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting. "Me?" Jay exclaimed. "I'll come long, sure, but I thought it was you who couldn't resist it." "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." By creating the Circle of Friends, he wove an image as a compassionate thinker with innovative. let me tell you, it loses its charm pretty quick." Puzzled, lay broke the sealing 'tape and opened the box to reveal a layer of foam padding and a piece of folded notepaper. Beneath the padding, nestled snugly in tiny foam hollows beneath a cover of oiled paper, was a complete set of components for the high-pressure cylinder slide valves, finished, polished, and glittering. The note read: Beyond the hard-packed barnyard earth lies a recently mown lawn. A concrete birdbath. Beds of roses..
