Not only did the carpeting continue up the walls, but as she walked from the kitchen, across the lounge area to the fireplace, and turned to look up at the sleeping loft, each place her feet touched a patch changed color to a pale, clear yellow. "But will it work even if the grey man is already in the garden of violent colors and rich perfumes, walking past the pink marble fountains where the black butterflies glisten on their rims?" asked Jack. This statement is, I think, based on a cognitive error inculcated (probably) by American high school education. The error is that all proofs must be of the "hard" kind, i.e., cut-and-dried and susceptible of presentation in syllogistic form. An acquaintance with the modern philosophy of science would disabuse people of this notion; even a surprising amount of scientific proof is not of this kind. As philosophers since Plato have been pointing out, aesthetic and moral matters are usually not susceptible of such "hard" proof. He shook his head, perplexed. Sirocco had endorsed the request, it was true, but Colman wasn't sure it would count for very much since Sirocco ran D Company, and anything he said was probably inverted somewhere along the chain as a matter of course. Perhaps he should have persuaded Sirocco not to endorse the request. On the other hand, if anything recommended by Sirocco was inverted to start with, and if Pendrey was crazy but normal by the Army's standards, and if the premises that Pendrey was working with were also crazy, then the decision might come out in Colman's favor after all. Or would it?
