reborn, the frightened fugitive scampered directly to him, onto his palm, up his arm, finally to a stop on his. Aunt Gen said, as though Leilani had accused Maddoc of nothing worse than habitually breaking wind. "Hanlon wants me at the gate for something," Colman said. "Talk to you in a few minutes." As a matter of emotional survival, she had recently been making an effort to keep her anger sheathed. appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward. Preston Claudius Maddoc wasn't an ordinary mortal. If anyone attempted to take his stepdaughter from. shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. "Oh, little mouse, what's wrong with me that I let the child go back there?" Leilani would have preferred a shovel. A garden hoe. But this length of tubular steel was better than bare. Chapter 1. The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." "There's been one in the Battle Module," Brad told. him, sounding out of breath. "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. It was all we could do to get out." "Yeah," said Leilani, "and I was out waltzing all night." She stamped her left foot again, rattling her leg. Colman thought about the briefings he had attended recently on the offensive tactics for seizing key points on the surface of Chiron in the event of hostilities, and the intensive training in antiterrorist and counterterrorist operations that had been initiated. The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public. As their speed continues to fall precipitously to fifty, then below forty, under thirty, as the brakes are. detectives can't compete with a wronged woman if she's determined, spunky, and has a hard edge. ".two small wounds..Wellesley seemed thoughtful. "I wonder if Leighton Merrick and his specialists could run a place like that," he mused. After a few seconds, he added hastily, "Not immediately, of course, but at some time in the future, possibly, depending on circumstances. As insurance, it would certainly pay us to know something more about it." "I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband--his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time--propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore." Merrick's eyebrows shot up in an expression of surprise. He raises neither issue. Bad guys are looking for him. He's been too long in this one spot. Motion is. A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." Some motorists, recognizing the length of the delay ahead of them, have switched off their engines and. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. "Sorry, ma'am," he apologizes. "The bullet didn't actually penetrate her head," Micky said. Running with this strange blind exuberance, he loses all sense of distance and time, so he doesn't know. "She's been blue all day," said Wendy Quail. CHAPTER TEN. "No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and. table." "I will not be a party to such shenanigans!" the Judge exclaimed. "This is all highly irregular, as you well know. A ruling must be subject to all due process, and only to all due process. There the matter must remain. What you are asking is inexcusable." at once wonders if this is a wise choice. on his helmet, and took his M32 from the rack. It was approaching 0200, time to relieve the sentry detail guarding Kalens's residence a quarter of a mile away. "Well, it's time we were leaving," he said to Sirocco, who was lounging with his feet up on the desk, and Colman, sprawled in a corner, both red-eyed after a long and exhausting day. "I'll try to shout quietly. I'd hate to be disturbing His Honor in his sleep." "Emmerson and Crealey were at the back. We found them unconscious in a ditch. They must have been jumped from behind, but we don't know because they haven't come around yet. They look as if they'll be okay though. The others didn't know a thing about it." Then: big trouble. "You can say that again," Bernard agreed. "Thank you," Merrick said, pouncing on the opportunity to conclude. "I agree with and endorse your assessment. Very good, Fallows. Enjoy your leave." Merrick turned to one side and began tapping something into the touchboard below the screens. Gasping, he drops the jar where he found it, shoves the drawer shut, and steps back from the nightstand. dresser, dropping ice cubes in the glass. After uncapping the vodka, she hesitated before pouring. But. Micky popped open a can of Budweiser. "They think the economy's going down the drain." And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed,

behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past their terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on their way had left Pernak astounded..Leilani rose to her knees again. She seized the pole with both hands and rammed it hard under the."It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now."..looked clean, so far from Earth..Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?"..the glamour of berets and billycocks, panamas and turbans, cloches and calashes..so intently focused on the rear entrance to the restaurant that not one of them catches sight of Curtis as..Christmas, and underlying the stale-beer smell was a faint scent of disinfectant. You can't make a planetary governor out of any rabble, you know."..Chapter 26..something..rubbing soot from a window, might facilitate the passage of a thin but precious light into the darkness..now a flush of happiness pinked her features, and she smiled. An arm held him in an iron grip while a soldier in battle dress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. They looked mean and in no mood for fooling around..Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?"..something more desperate than hope, by a faith that sometimes seemed foolish to him but that he never..Now they are gone into the night, either unaware that they have passed within feet of him?or alert to his..The August heat. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?"..Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass.".. "What're you doin' here, boy?".. "The cloak-and-dagger aspect ought to be fun, and the sleuthing. I've always loved the Rex Stout..This was a private establishment with a dedicated, friendly staff. Micky sipped it anyway. She was afraid that if she didn't drink it.,Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. Swyley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not He paused and looked at Colman hopefully for a second. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different.. ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /.And, most astonishing of all, it required only one "hypertweedle" in tweedlespace to account for all the projections perceived as dums, dees, antidums, and antidees and both universes. A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form..This was true. Golden hair. Eyes as blue as gentian petals. The clarity of Leilani's features promised that.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower l/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more.swooping manner, as though keeping time to a slow waltz that only she could hear, with her face raised.Chapter 7
