She patted him on the back. "Sure, I know. You forget, I read your dossier. It mentioned several interesting episodes that I'd like you to tell me about someday, from your 'soldier-of-fortune\* days?'. I notice that the blowers have cut off. It's earlier than usual, but obviously there's enough body heat to keep the dome buoyed aloft. I imagine the Central Arena drifting away like that floating city they want to make out of Venice, California. There is something appealing about the thought of this dome floating away like dandelion fluff. But now the massive air-conditioning units hum on and the fantasy dies. These cells could serve as potential organ banks for the future. If the time were to come when an Park, Old Buddy, when your message appeared on my display screen, I was just sitting down to send. She could pick up the hem, her left hand stiffened. The end result will be that though my clones, or some of them, might turn out to be valuable citizens of one kind or another, it would be very unlikely that any one of them would be another Isaac Asimov, and their production would not be worthwhile. Whatever good they might do would not be worth the reduction they would represent in the total gene variability of humanity. Thus, the facts alone make it clear that the King has no such intent. His real purpose in building the Project is to provide a haven. A haven to which the people can flee should a second phenomenal ram-fall again cause the Twin Rivers to overflow their banks to such an extent that the entire Plain becomes inundated. Living on that Plain, the members of Local 209 stand to benefit from the Project as much as the rest of the people. For them to have, in effect, sabotaged such a noble undertaking is, frankly, beyond my comprehension, unless their motive for doing so can be partially attributed to their unwitting acceptance of the popular interpretation of the Project's purpose. "I mean quit everything: running, swimming, practicing. . .". She winced. "No." "What do you think that feels like, here?" Did she expect him to recognize her? She was beautiful enough, certainly, to have been someone he ought to recognize, but if he had seen her on TV, he didn't remember. "Five years from now, that automated probe will leave the Sun and tour the nearby stars to search for habitable worlds... away from Earth, and away from all of Earth's troubles, problems, and perils. Eventually, if all goes well, it will arrive at same place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. "A new, fresh, vibrant world, unscarred by Man's struggle to elevate himself from the beasts, a place that presents what might be the only opportunity for our race to preserve an extension of itself where it would survive, and if necessary begin again, but this time with the lessons of the past to guide it." This statement is, I think, based on a cognitive error inculcated (probably) by American high school education. The error is that all proofs must be of the "hard" kind, i.e., cut-and-dried and susceptible of presentation in syllogistic form. An acquaintance with the modern philosophy of science would disabuse people of this notion; even a surprising amount of scientific proof is not of this kind. As philosophers since Plato have been pointing out, aesthetic and moral matters are usually not

susceptible of such "hard" proof.. "Good for you," he said when Amos had climbed onto the deck and given him the glass. "Now come." "Good evening," said Amos. "I'm exploring the ship and I have very little time. I have to be up at four o'clock in the morning. Anyway, nobody tried to get in. Not that they'd have succeeded if. Dramatization is another. I (like many reviewers) often stage a little play called The Adventures of Byline. Byline (or "I") is the same species of creature as the Kindly Editor or the Good Doctor, who appear from time to time in these pages. That is, she is a form of shorthand. When Byline rewrites story X, that doesn't mean that I?the real, historical personage?actually did or will or wish to rewrite story X, or that I expect its real, historical author to rewrite it to Byline's prescription, any more than my saying that "my" copy of Bug Jack Ban-on tried to punch "me" in the nose means that such an event really happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying about the page are not our real, live selves, and their exploits are dictated more by the exigencies of our form than by a desire for personal glory.. negotiations.. death is sensational or the dead prominent, the story might be tucked in anywhere except the classifieds.
