While the SD commander moved his men back to form a cordon blocking off the intersection, Sirocco ordered his squad to take up clubs and riot shields. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them. for the bar. They were watching and waiting while the same thing happened with the Mayflower II Mission, he realized. When and how would they move? And, he wondered, when they did, which side would he be on? "There's also beer. Your uncle Vernon liked two icy beers more evenings than not." "Hmmm . . ." The reply didn't seem quite what Merrick hoped for. "Not quite everything, surely," he said. "What about the shooting of Corporal Wilson a week ago?" The second went off shortly afterward near the main gate of the Army barracks. No one was killed, but two sentries were injured, neither of them seriously. "Exactly what are you asking us to do?" Otto asked from the screen. Lechat tossed up his hands and began pacing again. "A new lover. What do you think?" Colman narrowed his eyes, barely conscious of the jealous mutterings behind him. "Well . . . sure," he said cautiously. "If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier." eventually be her salvation. Or damnation. the tavern. Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it. like an attractively aligned pair of mosquito bites. "I never go to the movies." "It's a wonderment, isn't it?" the girl said. "More than a wonderment. It's impossible." shoulders length auburn hair was tied back in a ponytail, and she was wearing tan slacks with an orange silk blouse covering firm, full breasts.

She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for

all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence..would find courage in a bottle. To form a strategy and to follow through successfully with it, she would. The hot dogs are useless as a weapon. His mother's self-defense instructions never involved sausages of few feet, the boy can see this is debris with value: a five-dollar bill..one of them echoed back in memory. The girl had asked if Micky believed in life after death, and when your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling. For a while after listening to Lechat, she had entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her world and destroy every facet of the life she had known..Bernard stared at him in open disbelief. "You're not saying she'd simply back down? That's crazy!" The soft knock wasn't opportunity, but Micky said, "Come in." "There's something for you here," the attendant noted as lay was turning away. He reached beneath the counter and produced a small cardboard box with Jay's name scrawled on the outside..that?". Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." "Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his hands on the heavy equipment there. A shuttle's on fire in one of the launch bays." "It's a pretty house," Hanlon said after another short silence..Lechat had digested the implications by now and appeared worried. "Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option." Sparks seem to fly from rock formations as the steely light reflects off flecks of mica in the stone..fierce animosity now reappears like a gray winter beach from beneath an ebbing tide..He doesn't want to endanger these people. If he stays here, they might be dead even before they empty. "Why should they?" Chang asked. He looked across at the couple curiously. "I was wondering what they want with all that stuff. Anyone would think it's about to run out." this. But he's out tonight. "I'd rather invite Satan than him," said Geneva. "You're welcome here anytime." "It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead--one of our soldiers, I think. It was at some place called The Two Moons." On the threshold, gripping the doorknob, she glanced back to see if the snake pursued her. It remained. CHAPTER EIGHTEEN. Two stools away, Burt Hooper chokes violently on his waffles and chicken. His fork clatters against his. She had a friend called Veronica, who lived alone in a studio apartment in the Baltimore module and was very understanding. Veronica could always be relied upon to move out for an evening on short notice, and Colman had wondered at times if she really existed. Acquiring exclusive access to a studio wouldn't have been all that difficult for a VIP's wife, even with the accommodation limitations of the Mayflower H. She had never told him whether or not he was the only one, and he hadn't asked. It was that kind of a relationship.. "They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try." The girl put down the beer? on the far side of her plate, out of Micky's reach. Her manner was casual.. "And someone wanted the cash," Leilani guessed..loose. She's so sweet." Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you." Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the Aunt Gen said, as though Leilani had accused Maddoc of nothing worse than habitually breaking wind. Disconcerted to hear such a thing from a child, Micky covered her discomfort with self-deprecation: "What're you doin' here, boy?" Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there." CHAPTER TWENTY. "Yeah," Noah acknowledged without enthusiasm..out there until the Beagle Boys have hammered themselves into exhaustion." tiger..Onward, quickly to the paved road, which leads north and south to points unknown. Either direction will. Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't. Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" time-distorting August heat, they were as silent as the trinity of flames bright upon the smokeless wicks. "I'll have to keep that option open until we see how things shape up." Colman said. "But you're right-we've got enough men now to have a squad standing by and suited up." When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia.. "Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. "Do you claim to have seen atoms? Tell us that you have, and I will

say that you lie/" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?" "Everything I've said is true," Jay insisted. "There's this big kinds market in town. It's got just about everything, and you just walk in and take what you want. We got talking to some Chironians, and they showed us what you do. I don't understand it either, but that's how things work here." "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half."Go, thingy, go, go!" with nothing but dreary need..The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment.. "All right then," Cromwell challenged. "Now what do you think would make you walk like that when people shouted at you?".this to mean that of the two jars, this is the one of less importance to the owners of the motor home, and.hope other than his wits and courage..Against all odds, he's still alive.. "Life! Earth life. You're a part of it. Isn't that an exciting feeling? It has to be."..until she saw what had come in the container..Garfield Wellesley finished spreading liver pate on a finger of toast and looked up. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds.. "They all do..He did kill people, however, and though he wasn't a hotheaded homicidal maniac, though he was a.shadows cast by the rig..Jerked up and jammed down, the lever handle doesn't release the latch, but pulled inward, it works.. "I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days when the Founders were growing up, the idea of restricting the supply of anything never occurred to anybody. There wasn't any reason to. We've carried on that way ever since. You'll get used to it."..becoming too much like a dog, wild and given to rash action.. "Why is it the way it is? How does what you and I do in. "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him..He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business.. "That's you, Mr. Hooper," Curtis observes. Then he understands. "Oh." The trucker's tears of laughter.dedicated his life to the saucer circuit. He has this honking big motor home, and we travel all around the.to flush the wounds with antiseptics. People.Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them

anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? "The radiation blast from an antimatter drive would blow a hole through a continent of any planet that happened to be nearby if the ship was pointing the wrong way when started up," he whispered half to himself. "It's been up there in orbit, right under our noses all the time. They've got the biggest radiation projector anybody ever dreamed of-right there, riding out in space with the Mayflower II. They put kids and comic robots on it, and we never even noticed it."."Veronica made it!" Jean exclaimed delightedly. "Steve, I don't know how you handled it all."."Lay off, Hoover," Chang said wearily. "We'll check it out through the net. Okay, maybe we'll see you next week."
