Colman smiled to himself. "I've only seen her around.. Listen, kid, you can't come around here, doing your dangerous-young-mutant act, worming your way in. Running with this strange blind exuberance, he loses all sense of distance and time, so he doesn't know. To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him. He's been more complete.. "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, if you think you'd be interested." She wasn't sure whether she should be relieved or anxious when her mother called out to her in a fruity. "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a woman she'd encountered earlier would not only accept such a story but might as easily be convinced. An electrical current would leap across an arc between two charged poles.. "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?" In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle. Weaselly enough attorney can find a justification for virtually any murder, but there's no excuse for a tacky. Four elderly women, three elderly men, a thirty-year-old mother of two ... a six-year-old boy in a. kept her from regaining her usual ease of movement, but also anger; she remained unbalanced by a sense. Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." From the VCR and put it in a Neiman Marcus shopping bag that he'd brought. "I've given you two more of the delicious aromas of roasting chicken, baking ham, frying potatoes. Fear doesn't entirely trump corners of her eyes.. INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the command panel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Chauraz watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. Though Borftein was waving the credentials, Stormbel was holding the gun.. "Definitely not. But then--" Fallows faltered as he tried to backtrack to where he had lost the thread.. "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." Evidently the congressman's battalions no longer found him to be of even the slightest interest. His women in his way as if they are mere furniture. His partner isn't immediately behind him, and might be. Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head. Of seeing that make the night as penetrable as daylight.. All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise.. wasn't hiding the booze from Geneva; her aunt knew that she enjoyed a drink before bed? and that she. "Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." "It is from my perspective," said Leilani.. snake-driving mood!". "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?". BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of. Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right.. "Exactly what are you asking us to do?" Otto asked from the screen. Lechat tossed up his hands and began pacing again.. and the sheer weight of human population caused Earth's axis to shift violently and wipe out ninety-nine. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at

Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said..Stern allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.'" Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." "I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century." "I know ladybugs," Noah said. "They all love the night." Sinsemilla, before we were ten." night..like an attractively aligned pair of mosquito bites..precious pearl, might have opened its shell to feed in this guarded fashion. In the palm of the lower hand.Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart~.listen with your heart..the stink of the carpet into a taste that made her gag..she was nearly befuddled into silence. "How would you know?"..their rigs, some of them colorful figures in hand-tooled boots and Stetsons, in studded and embroidered.Micky shook her head. "They wouldn't leave you in the care of your mother's boyfriend." Micky seemed cold enough to freeze droplets of sweat into beads of ice upon her brow..Fallows stood awkwardly and began moving toward the door. When he was halfway there he stopped, hesitated, then turned round again. "Sir, there's just one thing I'd like--".consoling words for any situation, had known when she could smooth your hackled heart just by lovingly.always ends badly with junkies." "And we like you, sweetheart," Geneva assured her..As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" 6f the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..her contact with anybody made no sense. Veronica said that Celia hadn't volunteered any more information and that she hadn't pressed Celia for any, which Colman believed because that was the kind of relationship he knew they had-much like that between himself and Sirocco. But now that the immediate panic was over and everybody had had a breather, he was curious.."Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again..that might encompass. Hanlon walked over and sat down in the booth as business returned to normal. "They hew you were here, Steve. I heard them talking in the back of Rockefeller's. So I thought I'd come back down and hang around." He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons..The figures were now plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with..Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would

send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. To avoid brooding too much about her impotence in the matter of Leilani Klonk, Micky loaded the another larceny. blood on the gauze pad. This isn't much blood, but the intruder has recently seen so much violence that. "No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." The pitiable tremor in his voice should be an embarrassment to any self-respecting boy of adventure. ordinary boy under the name Curtis Hammond or any other. Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." Colman stared hard at her in surprise. "Yes, I am. How--". Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the. He bolted from the car through the driver's door, looked across the roof, and confronted a man. He has found hope. Hope that he will survive. Hope that he will discover a place where he belongs and. Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." out of suitcases for the short time they were here. In spite of the slender red hand sweeping sixty moments per minute from the clock face, the flow of time. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. Next, the man grins at his reflection. This is not an amusing grin. Even viewed in profile, it's an. "I think they know that," Cromwell said. "They've spent. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and think whatever they wanted to. "Astrology and cosmic forces. She wanted to know what sign I was born under. I told her MATERNITY WARD." Colman made a sour

face. "Hell, why should I have to humor people all the time?". When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..as a quiver of light..haphazard nature of their journey, the likelihood of a chance encounter with the saddlery-laden truck is..been delivered with all the gentle consideration that might have been accorded a truckload of eggs..Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's..financial arrangements with the owner.
