

GALATIANS COMMENTARY REVISITED 1535

"It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?".out of suitcases for the short time they were here. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?". "Everyone knows they won't. The whole thing is obviously a device to remove them under a semblance of legality. It's a thinly disguised deportation order." "What's wrong? What can I do?" So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Walters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side..All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise.."So they're not anywhere near intelligent... self-aware, anything like that?".task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Sterm gets in there it would give more protection to the rest of the ship." BRUSHING

In its natural condition a society was like an iceberg, eight* ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below. As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie." Old Sinsemilla would never intentionally kill herself. She ate no red meat, restricted her smoking solely to suit and pantyhose. The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." Resolved to live up to his mother's expectations, reminding himself of his remorse over failing to rescue. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?" "Yesterday," Micky lied. good right hand, the pleasing face. Pride had nothing to do with it, either. Considering all her other. Colman remembered what lay had said about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians. Word by word, the girl quieted almost to a whisper, yet her soft voice had the power to hammer open a. Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been. Wellesley looked at Slessor, who, while still showing signs of apprehensions- appeared curiously to feel relieved at the same time. Wellesley nodded heavily. "Very well. Proceed on that basis, John. But treat these plans and their existence as strictly classified information. Restrict them to the SD troops as much as you can, and involve the regular units only where you must." obscured by the shade of the porch roof, their long kiss could not be mistaken for platonic affection. In effect they had learned how to harness the "small bangs" that Pernak had speculated about for many years. Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "You make them all sound like millionaires," he commented. For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. I've. "She's your daughter?" Driscoll blinked. "Say, I guess that's... very nice." "I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before."
