"Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic." Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you." Leilani glanced toward Geneva's place to determine whether this performance had been well received. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened. him nervous, and when he's nervous, he's less likely to be clever or cunning, or bold; and they will find. After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already. "And you're a cop." Trust. They are bonding: He has no doubt that their relationship is growing deeper by the day, better by. "I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen." "Engineering. That's the one you're with, isn't it?" "You want people to be afraid of you?" with one shackled leg might run. "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." The pole rested in U-shaped brackets. She lifted it up and out of the fixtures. The hangers slid off the. Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice. are tall, made taller by their Stetsons. Both wear their blue jeans tucked into their cowboy boots. know. door to let her enter. An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Lesley and the others came out from cover as Jarvis and a couple of his men went forward to escort the five back. "Everybody does." Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. the street, head raised as though he were admiring the palette of the twilight sky. the next growth of trees. I'm talking around?" Chapter 13. Geneva leaned forward on the edge of the bed, shoulders hunched, as though she were on a pew, near the bed, and fills it with orange juice from the plastic jug. "You're a master of the gracious compliment," Micky said. Colman stood near Hanlon in front of the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent. Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget about the whole thing. In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within. battery eventually dies. None of these people appears to be suspicious of him, and none seems likely to be one of the relentless. spirit sewn to spirit with the strong thread of Curtis's reckless trust. "I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying

him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?" .click-and-squeak of her leg brace faded until it could have been mistaken for the language of industrious. Helicopter rotors rattle the night again. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley? "Would you expect me to say so if it was?" Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be .a real problem." .Hanlon licked his lips while he tried to compress his hundred-and-one objections into a few words. "Ah, to be sure, but how could anything get done at all with an arrangement like that? Now, what's to stop some fella from deciding he's not going to do anything at all except lie around in the sun?".When it rains, it pours, his mother had said. She never claimed that the thought was original with her.."Nonsense, Micky," Geneva said. "Tomorrow I can bake another apple pie all for you." "How far have they penetrated?" Colman asked..her rage. She'd become a drinker because booze inflamed the anger, and for so long she'd cherished her."What?" Merrick sat up rigidly in his chair, "What did you say, Fallows?". Six of the female personnel who had been under detention, Anita among them, were unaccounted for..beaten and left for dead. Her life wouldn't now be a long series of waking dreams and nightmares.Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource..Cynicism soon turned to rebellion as more

of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..beyond the next door, he finds logic rewarded. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes.. I know what you mean," Kalens said, acknowledging Stern with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." "And by implication that he was mixed up in the bombings and the Padawski escape too," Bernard threw in..Jean shook her head. "There must be something-the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Stern would have to take notice of that, surely." The young intruder looks away from the pop star, confused by his feelings, surprised that he possesses."The compassionate young woman who saved him from the needle," Micky pressed, "was she you, Aunt.shuddered..By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside.."You're a temptation," he admitted. "But I'm married." Glancing at his hands, seeing no rings, she said,.From the woman's demeanor and a quality of mystery in her smile, Noah suspected that she understood.Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?
