

GOETHE'S FAUST

As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie."...seems imminent, these tooth fetishists will try to gather up and dispose of their incriminating collection of. At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting, but she willed steel into her good knee and kept moving.. "Maybe I was stupid because I wanted to be stupid." He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~ could have. used some lessons..different reasons. Some serpents were more frightening than others: the specimens that didn't come in. flickering tongue designed for deception..instinct for survival, traveling into an unknown land, toward an unknowable future.. "Aunt Gen, you're thinking of The Man with the Golden Arm. Frank Sinatra, Kim Novak. It hit theaters. Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now- I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle. Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis. "What else can you do?" Juanita asked..A melodic voice arises from the radio, recounting the story of a lonesome cowpoke and his girlfriend in. "A new lover. It's not far from here at all." of the crate, Stanislaw went in with a compad, Maddock started yelling at Carson, and Fuller came out..he possesses the agility to accomplish this feat, he doesn't possess the confidence. Peering down from his. As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. delivered. After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by. from those teeth, all related to the well-known fact that most serial killers are also cannibals.. There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion.. passing-for-nobody-special business. He hasn't given a thought to naming his four-legged companion.. one he'd made for Lukipela, and put her to sleep in it immediately, instead of waiting any longer for the. "Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered.. Cliff Walters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Walters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?".. against the sensitive surfaces of his upturned eyes.. Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end

on the other side of the raised platform from which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. "The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..". Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right..synchronized spirit to spirit. Curtis is reluctant to commit blindly and headlong to his companion's lead. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years..Donella says, "Curtis, I'm sorry I snapped at you." Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur. Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass." for him..And perhaps his mother's spirit watches over him.. "No, of course not," Fallows said, not very happily. "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module.. "Sucky," Aunt Gen said..sliding doors. He draws a deep breath, clenches his teeth, and opens the closet..A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise..Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation..a gun under them."..Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her communion with the nozzle, feeding on two hundred million years of bog distillations..bad idea. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod..the house across the street and being greeted at the door by his lover. If Noah reached for the camera,..Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in.. "Healed?" More of his mother's wisdom..The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..Wellesley, Borftein, and Lechat were standing

Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away?.Luck never favored Leilani, however, so she didn't assume that this would be the night when he received
