"I don't want to go off into a lot of personal anecdotes and reminiscences. That kind of thing is customary on an occasion such as this, but it would be trivial, and I wouldn't want my last speech as president of NASDO to be marked by trivia. The times do not permit such luxury. Instead, I want to talk about matters that are of global significance and which affect every individual alive on this planet, and indeed the generations yet to be born--assuming there will be future generations." He paused. "I want to talk about survival--the survival of the human species.". "Good for you," he said when Amos had climbed onto the deck and given him the glass. Critical judgments are so complex (and take place in such a complicated context), the vocabulary of praise and blame available in English is so vague, so fluid, and so constantly shifting, and the physical space allowed is so small that critics welcome any way of expressing judgments that will be both precise and compact. If vivid be added thereunto, fine?what else is good style? Hence critics, whenever possible, express their judgments in figurative language. Wit is a form of condensation (see Freud if you think this is my arbitrary fiat) just as parody is a form of criticism (see Dwight McDonald's Modern Library collection thereof)..They're probably from the Blue Orion Theatre up the street Would you like to see the show there tonight?".together and secured with rubber bands. There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences.\* In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change.
