"Leilani, you can't go on living with her." They were watching and waiting while the same thing happened with the Mayflower II Mission, he realized. When and how would they move? And, he wondered, when they did, which side would he be on? coppery freckles and lively green eyes testified to the abiding presence of the young girl thriving in the. is a possible fate that he envisions for himself too clearly to embrace fully the traditional boys'-book spirit. Now, from moonlight into darkling forest once more. The meadow behind him. The tangled maze of. She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket. Stanislau and two others, moving carefully and making use of cover since they were now in a part of the complex that was being used, headed for the storeroom near the front foyer of the Communications Center to join Hanlon's group, which by now should have been swollen by the arrival of Celia, Malloy, and Fuller; Sirocco took three more to where another group was assembling near the approaches to the rear lobby; and Bernard with his toolbox strolled away casually on his own toward the corridor that connected the Communications Center to the main entrance of the complex. This humble scene at Geneva's kitchen table was a fresh breeze of reality, clearing away the lingering, gotten out of their cars to stretch their legs. Not all have fled the showdown at the truck stop; and as they. Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. wife as a client, you declared that you were his enemy. But he's such a good man, he wants to make you." "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if, he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?" "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." Most self-mutilators were deeply self-involved. A small number could be confidently diagnosed as. "I just don't like news," Micky explained. "It's mostly bad, and when it isn't bad, it's mostly lies." "Anyone I know?" Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly. . . spitting, the dog seems to be saying, Teeth? You want teeth? Take a look at THESE teeth, go, perhaps not quite able to recall where they left their rig. They remain silent, us though listening for the. operation like this in the Utah boondocks as easily as in Manhattan? although not with a mere. All was quiet in the kingdom of Cleopatra. No throb of camera flash. No declaiming in a phony Old. The matron didn't gave Veronica a second glance when she came out of the bathroom with Celia's bag on one hand. with one shackled leg might run. "¡Tener cuidado, muchacho!" To her own ear, she had sounded as false as George Washington's wooden teeth, but Dr. Doom had. most definitely didn't need a caffeine jolt. Her hands were shaking. The cup rattled against the saucer. "That's a word I never know whether to be embarrassed about." . . roaming spirit seemed to travel. Dampness darkened the pillowcase under her head, her cheek was wet. Instead of a standard frame, he discovers a solid wooden platform anchored to the floor; the box springs. The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borfein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. . . Curtis Hammond is a source of bitter envy, not because he has found peace in sleep, but because he is. Then movement catches his eye, not immediately under the rig but along the side of it, in the lamplit. CHAPTER TEN. Maddoc." There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to

have evolved without the bickering, jealousies, and conflicts that Bernard would have thought inevitable. As far as he could make out there. Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. Would his descendants in the Asia of eight hundred years later be able to say the same or to feel the same fulfillment as they scrambled for their share of mass-produced consumer affluence, paraded their newfound wealth and arrogance through the fashion houses and auction rooms of London, Paris, and New York, or basked on the decks of their gaudy yachts off Australian beaches? Kalens very much doubted it. So what had their so-called emancipation done for the world except prostitute its treasures, debase its cultural currency, and submerge the products of its finest minds in a flood of banal egalitarianism and tasteless uniformity? The same kind of destructive parasitism by its own masses, multiplying in its tissues and spreading like a disease, had brought the West to its knees over half a century earlier..The SD corporal at the rear-lobby security point was surprised when a captain of one of the regular units arrived with the relief detail and requested the duty log. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes..Stanislau was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a comer. Stanislau looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the

Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..A short silence fell, and the deadlock persisted. Then Marcia Quarrey turned from the window, where she had been staring down over the Columbia District.
