When Amos came up to the ship with the mirror under his arm, he called, "Here's your mirror.."It turns," Lang said quietly. Then they returned to.237.Hinda stood at the door and raised her hand to shade her eyes. The last she saw of him was the flash."You must show how clever you are," said Lea. "When I was free of this mirror, my teacher, in order to see how well I had learned my lessons, asked me three questions. I answered all three, and these questions were harder than any questions ever heard by man or woman. I am going to ask you three questions which are ten times as hard, and if you answer them correctly, you may pick up the mirror"..about being tall, handsome (or beautiful), noble, admired, and involved in thrilling deeds is not the same.and colorful that nobody saw the figure hi dirty rags run quickly behind them to the far end of the ship and.alley on the 13th?though the details of the murder didn't seem to fit the pattern. "In there is my jewel garden. I have more jewels than any man in the world. Ugh! They give me a headache. Go quickly, take your reward, and when you come back I shall show you a man living through the happiest moment of his life. Then I will put you and your jewels into the trunk with my nearest and dearest friend." .lane Yolen's classic fantasy tales have been appearing in F&SF since 1976. Eventually, if all goes well, it will arrive at same place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. "A new, fresh, vibrant world, unscarred by Man's struggle to elevate himself from the beasts, a place that presents what might be the only opportunity for our race to preserve an extension of itself where it would survive, and if necessary begin again, but this time with the lessons of the past to guide it." .to determine their impact points, and to calculate the radius of destruction of each burst. "Is this just a morale session? Thanks, but I don't need it. I'd rather face the situation as it is. Or do." "Look," Dan said. "We've got a visitor." They had little trouble finding where the Matthews came from. They found dozens of twenty-centimeter lumps on the sides of the large derricks. They evidently grew from them like tumors and were released when they were ripe. What they were for was another matter. As well as they could discover, the Matthews simply crawled in a straight line until their power ran out. If they were wound up again, they would crawl farther. There were dozens of them lying motionless in the sand within a hundred-meter radius of the garden. "There was no point in getting him involved. No one would get the impression that any care had been taken in the haphazard arrangement of dome, lander, crawlers, crawler tracks, and scattered equipment. It had grown, as all human base camps seem to grow, without pattern. He was reminded of the footprints around Tranquillity Base, though on a much larger scale. trip. Time enough for that on later flights. We were blinded by our loyalty to the test-pilot philosophy of Tom Reamy. "And it said glumphvmr, and fuffle, and fulrmp," Amos told her. A highly depressing idea, but he did not on that account roll out the console to select a remedy from the menu. He knew from long experience that whatever could make him palpably happier was also liable to send him into a state of fugue in which conversation in the linear sense became next to impossible. So he passed the time till the next switchover by working out, in his head, the square roots of various five-digit numbers. Then, when he had a solution, he'd check it on his calculator. He'd got five right answers when his chair reared up, god bless it, and bore him off toward . . . Would it be the couple chained, wrist to wrist, on the blue settee? No, at the last moment, his chair veered left and settled down in front of an unoccupied bent-wood rocker. A sign in the seat of the rocker said: "I feel a little sick. Back in five minutes."
