

LES ENFANTS DUNDERGROUND

LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn..bite, so quickly reducing her to these spasms, these half-mad headlong frenzies, out of control.."Yes," 'Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways."..when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her..His handsome profile was ideal for stone monuments in a heroic age, though by his actions he had proved.2. The engineer iii coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?"..Cliff Walters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter

when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..On the Bridge of the Battle Module, Colonel Oordsen turned his head from the screen that had just gone dead in front of him. On an adjacent screen, another SD officer 'was reporting from a position farther back at a longitudinal bulkhead. "Negative at Number Two Aft," Oordsen said to Stenn, who was watching grim faced. "I know that movie,".THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment." Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..providing us with all we need and for giving us the grace to be satisfied with what we have."..Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table..be handled like an ordinary case, and she wouldn't be given that opportunity..As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" 6f the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..Lesley nodded. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there ~." He frowned at the expression on Colman's face. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. "I know--awful,.The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?". "I never realized," Geneva said miserably. "Never. I never suspected." Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call." In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he got my orders." "So have I." "That's different." "How?". "Fifty-fifty," Colman answered. "It would have been ~zero the other way." mother became interested in it. According to psychologists, most self-mutilators were teenage girls and cotillion.. "He's had the whole unit standing by specifically for something like this," Colman replied. "He's waiting for news right now, that's why I'm here." Curtis interprets insects hard at work in the hot, dry air. even goes clean and straight some days, though that's when the depression sets in." Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went; . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too.
