Is it simply that I'm screwing up on my own hook, or is it because we're exploring a place no. I flagged a cab to take us back to the cabletraio station. Amanda said nothing for the entire ride, just sat staring at her hands clenched in her lap. I put an arm around her. She stiffened momentarily at my touch, then buried her face against my shoulder. The suitcase, still beside the couch, hadn't been unpacked? except for the clothes hanging in the closet and the kitchen utensils. There was underwear, socks, an extra pair of shoes, an unopened ream of paper, a bunch of other stuff necessary for his writing, and a dozen or so paperbacks. The books were rubber-stamped with the name of a used-book store on Santa Monica Boulevard. They were a mixture: science fiction, mysteries, biographies, philosophy, several by Colin Wilson.. This statement is, I think, based on a cognitive error inculcated (probably) by American high school education. The error is that all proofs must be of the "hard" kind, i.e., cut-and-dried and susceptible of presentation in syllogistic form. An acquaintance with the modern philosophy of science would disabuse people of this notion; even a surprising amount of scientific proof is not of this kind. As philosophers since Plato have been pointing out, aesthetic and moral matters are usually not susceptible of such "hard" proof.. Moises shook his head. "This I do not know. But when two weeks had gone by and there was still no word from the Board. Colman frowned to himself as his mind raced over the data's significance. No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize. But in the meantime they were wide open in the middle.. "Come on," said Amos, "just a little way. . ." .
