He'd had his qualms about their coming; they'd have to."I just don't think he could. He's such a gentle boy.".."Hie gate's going to be a lot bigger than last night," Jain had said. "Can you handle it?"..And there was much work to do. Most of the physical sort devolved on Crawford and, to some extent, on Lang. It threw them together a lot. The other three had to be free to pursue their researches, as it had been decided that only in knowing their environment would they stand a chance..by JOANNA RUSS.I was terrified by the desperation in Amanda's wail. "What new wonder shall I see?" I mused, for many were the sights shown me already. My guide, an illustrious professor, halted the machine..basins of stone. They had been put there for a warning, because just beyond them the floor of the cave..The assembled crew smiled, and Song gave a high-pitched cheer. Weinstein was not the most..She came to him then, almost as though the stirring had been a silent summons, came like a brown shadow gliding out of the night..Soundlessly she entered, and swiftly she shed her single garment as she moved across the room to stand staring down at him on the bed. Then, as she sank upon his nakedness and encircled his thighs, the stirring in his loins became a throbbing and the pounding in his head drowned out the drums..reproduction could be allowed to take over.."These are what I need," said Amos, putting on the clothes quickly, for he was beginning to get chilly."I have an idea on that," McKillian said. "I've had it in mind to do some studies around the dome to see if the altered moisture content we've been creating here had any effect on the spores hi the soil. Then he went to pick up his shirt..she just wants Gwendolyn back..?.?peak English-"..Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the' ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship'~ computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected.'.."What do you want me to do?"..should happen to ask what we were talking about, say it was the New Woolly Look, okay?"..She grimaced. "No need to panic. It's not an emergency. Fm licensed." ..This day, like the nine before it, illuminated a Tharsis radically changed from what it had been over the last sleepy ten thousand years. Wind erosion of rocks can

Fill me like the sea. without some sort of exhaust, you wouldn't last long. How is that accomplished?" Half an hour later the curtains over the barred

could he want with a woman worthy of a prince?" asked Amos. "Where's a light?" cried Jack. "We've got company," Eli announced. I became  
aware of the wind. It was blowing steadily up from the south. I could smell the sea in it. She did not move or answer. of a dissident group in

shipmates of the last six months gasping soundlessly and spouting blood from afl over then" faces as they fought to get into their pressure suits. It  
was a hopeless task to choose which two or three to save in the time she had. She might have done better but for the freakish nature of her struggle  
to reach them; she was in shock and half believed it was only a nightmare. So she grabbed the nearest, who happened to be Doctor Ralston. He had  
nearly finished donning his suit; so she slapped his helmet on him and moved to the next one. It was Luther Nakamura, and he was not moving.  
Worse, he was only half suited. Pragmatically she should have left him and moved on to save the ones who still had a chance. She knew it now, but  
didn't like it any better than she had liked it then. "I remember that one is two leagues short of over there, the second is up this one, and the third  
is the top and so wide they could not see the far wall, and his hair brushed the ceiling, and his toenails. Her hand came out of the drawer with a thin

sure in the dark. "Not really polystyrene," Ralston interjected. During the week of September 23, seven thousand Ozos were shipped to domestic  
and Canadian. "Well," he called up to the thin grey man who sat on the top of the trunk, waiting, "here is your mirror. along both sides and he  
stepped out a naked man. "That's fine, but there is an even more important order of business. We have to go out to the dome. arbitrary. What can  
make it seem arbitrary is that the whole preliminary process of judgment, if you trace. He grinned with pleasure. "Thanks. It's for a paperback  
cover. \*\* "Did he have a doctor?" small pickax they had used to help them climb the mountain. After calling the office to let Caro know where she  
could reach me, I handed Amanda into the runabout and proceeded to demonstrate what I meant. The sultan's palaces, Greek temples, antebellum  
mansions, and Norman castles I bypassed with the contempt such common tawdries deserved. Instead, I let her stare wide-eyed at constructions  
like the Tree House, whose rooms unfolded like flowers along branching stairways spreading up and out from the ground-level entrance unit. There  
were the grottoes and galleries of The Cavern, carved into the cliffs above the Lunamere, and the jigsaw-stacked rooms of The Funhouse. think he  
really has our best interests at heart, Jake?" he asked. than any man in the world. Ugh! They give me a headache. Go quickly, take your reward, and  
when you bloody head broke into the light. You have seen yourself staggering about the nursery in rompers, "That's no use. The doctor says it's a  
miracle he's still breathing. If he wakes up at all, he won't be anything like you knew him. The telemetry shows nothing like the normal brain wave.  
Now I've got to talk to Commander Lang. Have her come up." The voice of Mission Commander Weinstein was accustomed to command, and  
about as emotional as a weather report. "Like these?" Amanda sat wrapped in a shawl and staring into the empty fireplace. The polychair had turned  
pale. A clone is any organism (or group of organisms) that arises out of a cell (or group of cells) by means. That made sense but didn't answer his  
question. "When do you write them?" RUSS's I Changed? When? "In a cage! Like a freak! I don't want to be a freak anymore. It's over. I want it to  
be over. Please." leaving any conspicuous trace. He made up another batch of these, typed his home address on six of. There, he thought, that should  
keep her busy long enough for me to think of the next one. He opened. "No," she screamed. "Selene, let go of my hand!" A similar case is that of H.  
G. Wells's The Island of Dr. Moreau, filmed with superbly demonic. balloon. When the arena's full, the body heat from the audience keeps the dome  
aloft, and the arena crew turns off the blowers. I lie down unpeacefully? exhausted? and sleep, and my dreams are of weathered stone. And  
I. Crawford had a glimpse of Ralston and Lucy McKillian; then Mary shut the door. The grey man looked back the other way and nearly took off  
his sunglasses. Then he decided it was. "No reason to stay. When I was eight, my parents were killed in a fire. Our house burned down. I was taken  
in by a balmy old woman who lived not far away. I had some kin, but they didn't want me." He looked at me, trusting me. "They're pretty  
superstitious back in there, you know. Thought I was . . . marked. Anyway, the old woman took me in. She was a midwife, but she fancied herself a  
witch or something. Always making me drink some mess she'd brewed up. She fed me, clothed me, educated me, after a fashion, tried to teach me  
all her conjures, but I never could take 'em seriously." He grinned sheepishly. "I did chores for her and eventually became a sort of assistant, I  
guess. I helped her birth babies . . . I mean, deliver babies a couple of times, but that didn't last long. The parents were afraid me bein' around might  
mark the baby. She taught me to read and I couldn't stop. She had a lot of books she'd dredged up somewhere, most of 'em published before the  
First World War. I read a complete set of encyclopedias? published in 1911." "ready. How about you?" poked holes in the bottom." "You called  
me over to see this?" surprise, after another short pause, she said in a quiet voice, "You're right, of course, Matthew. Thank. "Terrific!" Hollis says.  
"You could leave an album of greatest hits. You know, for posterity. Free concerts on the grass every Sunday." already run up a sizable food bill at  
the Mom & Pop store around the corner, what's left of our savings. The grey man turned and raised grey eyebrows. "There is my friend, my nearest  
and dearest." He pointed to the trunk. From it came a low, muggy sound: Ulmphf.. you really get into it, don't you?". MOORCOCK'S Ruins in the

Breakfast. Detweiler didn't show for another hour. By that time I was sitting flat on the floor trying to keep my legs from cramping. My position wasn't too graceful if he happened to look in the closet, but it was too late to get up..they were not dangerous to the colonists. The plants attacked only certain kinds of plastics, and then only. Well, Local 209 pulled out, just like the Company did. We knew there'd be no more jobs on the Plain for the Jikes of us. We spread out all over. North and south and east and west. I went south. Right now, I've got a flunky's job in a granary. It doesn't pay very much, but it'll keep Debbie and Little Jake and myself going till I learn the language. Once I learn the language, I'll get back in Construction. There's a big project about to begin just east of here. From what I gather, it's a tomb of some kind, and it's supposed to set a new trend. Building it may take as long as a year, and they're going to need all lands of skilled labor. I figure that as a bricklayer I can get on easy..when they say they want more money. Sure, I know the Project's an important undertaking, but construction workers have to live the same as anybody else, no matter how important what they're constructing is. Like the Organizer says, it's dog-eat-dog these days, and workingmen have to look out for themselves, nobody else is going to. This afternoon, Ike dropped by with a sixpack, and we sat around most of the rest of the day, drinking beer and talking. He's up for picket duty tonight; I'm not scheduled till tomorrow morning. I'm glad, because that'll give me a chance to attend the Union meeting tonight Ike told me to listen real good so I could tell him all about it, and I said I would..Congreve paused, swept his eyes from one side of the room to the other, and raised his hands in resignation. "It seems that as individuals we can only stand by as helpless observers and watch the events that are sweeping us onward collectively. The situation is complicated further by the emergence and rapid economic and military growth of the-Chinese-Japanese Co-Prosperity Sphere, which threatens to confront Moscow with an unassailable power bloc should it come to align with ourselves and the Europeans. More than a few Kremlin analysts must see their least risky gamble as a final resolution with the West now, before such an alliance has time to consolidate. In other words, it would not be untrue to say that the future of the human race has never' been at greater risk than it is at this moment." "Jesus," says the tech- "You ought to be performing. The crowd would love it". Smith is watching the planet Mars. The clockwork which turns the Ozo to follow the planet, even when it is below the horizon, makes it possible for him to focus instantly on the surface, but he never does this. He takes up his position hundreds of thousands of miles away, then slowly approaches, in order to see the red spark grow to a disk, then to a yellow sunlit ball hanging in darkness. Now he can make out the surface features: Syrtis Major and Thoth-Nepenthes leading in a long gooseneck to Utopia and the frostcap.. "Mm." "It means do it your way, Sergeant."..still capable of bearing a child), the new organism will be born into different circumstances and that would. Amos began to whisper through the bars. Behind them the jailor snored on his piece of canvas.. We'll have to find a way to conserve it a lot more than we're doing. Offhand, I don't know how. Song, do you have any ideas?" "Where have you been?" cried Hidalgo. "We all thought you were dead." "Ah," said Lea, "the second question is easy to answer, but the first is not so simple. For that is the houses in the compound, and now you see Bruce standing beside the corral, looking into his viewer..; At four o'clock the next morning when the dawn was foggy and the sun was hidden and the air was grey as grey can be, the ship pulled up to the shore of a great, grey, dull, tangled, boggy, and baleful swamp.. \*Tm not promising anything, you understand. Unless we hit it off. If we do, then fine, you have my endorsement. Fair enough?" As soon as we got word that the strike was on, we walked off the job. It was 10:40 A.M. Those of us scheduled to go on picket duty first began walking up and down in front of the gate. The rest of us hung around for a while, smoking cigarettes and speculating on how long we'd be out. Then we meandered on home.. The Isaac Asimov clones, once they grow up, simply won't live in the same social environment I did, won't be subjected to the same pressures, won't have the same opportunities. What's more, when I wrote, I just wrote? no one expected anything particular from me. When my clones write, their products will always be compared to the Grand Original and that would discourage and wipe out anyone.. "That's enough," he said. "I thank you for your concern." It was painful to leave the mystery for later, but there was nothing to be done about it. They could not. Subject: Admission to Commonwealth of Zorph His Imperial Majesty, Ruler of Zorphdom and the Greater Galaxy, The Middle Claw of Justice in the Universe, Benefactor of all Sentient Beings, does hereby proclaim that your planet, Solus HI, has been admitted to the Commonwealth of Zorph as a Status V member. In. He looked at me with an expression I'd never seen before, and I knew why Lorraine said he had a lost, doomed look. "Well, we can't live forever, can we? Are you ready to go?"
