The story was on page seven. Fortunately they found the body in time for the early edition. A woman named Sybil Hern* don, age 38, had committed suicide in an apartment court on Las Palmas. (Detweiler hadn't gone very far.

The address was just around the corner from the Almsbury.) She had cut her wrists on a piece of broken mirror. She had been discovered about eleven-thirty when the manager went over to ask her to turn down the volume on her television set. They looked at the floor. Then Jack got down on his hands and knees and looked under the cot..could scrounge. It would be useful later for heating, and for recharging batteries. They managed to convert plastic packing crates into fuel containers by lining them with sheets of the double-walled material the whirligigs used to heat water. They were nervous at this vandalism, but had no other choice. They kept looking nervously at the graveyard as they ripped up meter-square sheets of it.. "I See You" is the first new Damon Knight story in many years; it was the feature story in the arm of the couch like a little gnome and smiled. It ran its fingers down the side of Detweiler's cheek. "You have answered all three questions wrong," said Lea, sadly. Then somebody grabbed the grey man by the right arm, and somebody else grabbed him by the left, and they pulled him down on his back, rolled him over on his stomach, and tied his hands behind him. One picked him up by the shoulders and the other by the feet, and they only paused long enough to get the mirror from the clearing, which the unicorn let them have gladly, for there was no doubt that they could have answered Lea's questions.. "You've heard of the long-period Martian seasonal theories? Well, part of it is more than a theory. The combination of the Martian polar inclination, the precessional cycle, and the eccentricity of the orbit produces seasons that are about twelve thousand years long. We're in the middle of winter, though we landed in the nominal 'summer/ It's been theorized that if there were any Martian life it would have adapted to these longer cycles. It hibernates in spores during the cold cycle, when the water and carbon dioxide freeze out at the poles, then comes out when enough ice melts to permit biological processes.
