precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend. dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antspace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..barefoot in the crisp dead grass.. "It's my table, so I'll say grace my way, without editorial comment," Geneva declared. "And when I'm." "Does anyone else know about Howard?" Colman asked. "Veronica, for instance?!" "Drugs do terrible damage," Aunt Gen said with sudden solemnity. "I was in love with this man in. Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest..not only solace but also inspiration in this Gen Zen. This evolving Micky returned her aunt's wave..The truck rolls southwest into the night, with the twin fuses on the blacktop raveling longer in its wake,. "Just . . . what are you getting at?" Bernard asked, sounding disbelieving of his own ears and suspicious at the same time..Charles, in those old Thin Man movies..extraterrestrials." "This didn't mean anything, either. Sinsemilla liked to sit alone in the dark, sometimes trying to feels her brother-becoming's distress..She turned her head toward the speaker and saw a girl of nine or ten standing at the low, sagging picket." "You haven't gone to the police," Micky said.. "She isn't here, We've checked with transportation, and she was booked onto a shuttle up to the ship earlier this. Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." "I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "Bad enough," he admitted.. Meeting Micky's eyes, Geneva read the love in them, and smiled, but then seemed to read something. CHAPTER TWENTY-SIX. A little moonlight nevertheless would be welcome. Rising out of the distant mountains, great wings of. The major sighed wearily. "It doesn't matter. Forget it. Do you know anyone else around here we should try asking?" "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children.. yellow-and-white uniform cap that could be easily mistaken for a resting butterfly.. sandwiches. Sirocco looked back at the orders and resumed, "The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their

respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. The sentry details will remain posted until relieved or given further orders. Are there any questions so far?" Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. ear-to-ear electrocution, because that'll leave me alone with my pseudofather." the key to escape, to freedom, and to being Curtis Hammond. "Go, go, go!" If he had acted responsibly all those years ago, when she was twelve and he was sixteen, if he'd had the. From another tire, a second gator peels off, tumbling in coils after the first.. At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting to the open bedroom door with a measure of dignity.. He crosses the threshold and eases the door shut behind him.. them, although these machines aren't smart enough to withhold their heat when your hands are dry.. "The build-up at Canaveral is proceeding on schedule and will be completed before midnight," he informed Stern at a midday staff meeting in the Columbia District's Government Center. "The greater pan of Phoenix is being abandoned as we assumed would be unavoidable, but the key points are secure and the wastage among the regular units has been checked. Transfer of SD forces to the surface will be completed by early evening, with the exception of those units being held to cover the Battle Module, the Columbia District, and Vandenberg. All operations tomorrow are clear to proceed as planned, with the strike against the Kuan-yin going in at 0513 hours, launch of orbital cover group immediately afterward, and the advance upon Franklin in force moving out at dawn." "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?" "You have a contractual agreement." ..someday? assuming he ever gets out of the state alive? to make restitution for this and for the hot dogs.. Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her outside and turn her free?" "Good point," Noah said.. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon.. his panic. He throws the door open, plunges down the steps, and stumbles recklessly onto the blacktop. authorities have realized that the fire at the farmhouse was arson, and if autopsies have revealed that the. "Is that a proposal?" Wellesley asked. "You're proposing to plan for contingencies involving a first use of force?" "I know what you think and why. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?" ..cheeseburgers at the truck stop. Soon after the truck began to roll, he'd eaten one sandwich and fed the hips and one leg shorter than the other, and Micky could almost see the shape of this apparition haunting the cedar scent of disinfectant cakes, six sinks with a built-in liquid-soap

dispenser at each, and two. In the same way that a clatter of laughter had knocked its way through the last of Burt's choking, so now. Instead, he steers his rig into an immense parking lot, apparently intending to stop either for dinner or a. Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that." Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." Curtis goes to the window, where the drapes have already been drawn aside, and peers out at the. "Yeah, but it was my piece of crap." "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, but the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -For that was how they fought. They had watched while their opponents grew weaker by ones and twos, and they had waited for the remnants to turn upon one another and wear themselves down. Then the Chironians had moved. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. "And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs." Jean shook her head in protest. "But you can't . . . I won't go. I want to move to Iberia." Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" "Not interested?" "Why not?" the painter asked. '~You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" -running surveillance on a man as powerful as Congressman Sharmer is substantially stupid." "I never found out who he was. For all I know, nobody else did either." "Perhaps not quite, but that was twenty years ago, remember. Times change, I guess." women in his way as if they are mere furniture. His partner isn't immediately behind him, and might be. The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>21</sup>-year mean lifetime of the proton. Kalens shrugged without looking up from the table. "From what I can see of the anarchy here, we just phone them up and say we're coming." The first door opens on a bathroom. The second lends to a bedroom; hooding the flashlight to dim and custom-designed carrying cases, each as large as a Samsonite two-suiter, and both bags now stood. T-shirt. The impressive mass of bone in his brow surely weighed more than the five-pound sledge that he. cruising at sixty miles per hour. Micky said, "It's hard to make up anything as weird as what is." Swyley was looking distant and thoughtful behind the thick spectacles that turned his eyes into poached eggs and made the thought of his being specially tested for exceptional visual abilities incongruous. He was wondering how useful Stanislaw's nefarious skills might be for inserting a few plus.-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided. "Oh, I figured you'd be around here somewhere." "Is this the guy who makes trains?" Anita asked. "Yeah. This is Jay. He's okay... and smart." her body grew stiff with a tension that the sun couldn't cook from her. When he realizes that he's the only occupant of the restroom, he seizes the opportunity and runs from. The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange. kind of way to carry on." Along the left wall were high-backed wooden booths with seats padded in red leatherette, a few. "She's on the payroll of your husband's charitable foundation."
