

## STATISTICS FOR BUSINESS AND ECONOMICS

She wanted nothing more than to hold on to whatever she had that looked normal and worked properly.. "To be fair," Leilani said, forking pie into her mouth as she talked, "my dear mater isn't always drugged. CHAPTER EIGHTEEN. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing..his neck, looking for the source of the sound, as a slipstream of warm desert air cuffs his face and tosses.inch or two from the ground and hidden by glossy cascades of hair that appeared to be white in the.~Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. provided that ass-faces like Farnhill didn't go and screw things up.. "Easy, easy now," Micky counseled, still on her knees, making placating gestures with her hands.. "I .. don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook..Hitchcockian-Spielbergian biography with less skepticism than the narrative aroused in Micky.. "But they seem to have an intuition to make human value judgments," Colman objected. "They know too much about how people think.. Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier..Then Colman's communicator started bleeping. Bernard Fallows was calling from the Communications Center. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?.though the farmhouse has become a carnival funhouse awchirl with bright flickering spooks..Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of.. "A new lover. What do you think?".. "I'm with company, but they're safe. What-".Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. He said nothing, which meant that he didn't agree.. "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek .... "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested..Veronica had to bite her lip .to suppress the beginnings of a giggle.. "A Chironian..".It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. The white-uniformed cook.Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. It was a sobering one.."Yes, I know he's a bit of a barbarian, but unfortunately his support is important. And if there is trouble later, it will be essential to know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product.."We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. On the level below

him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the right angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew.
