

## STRESS AM ARBEITSPLATZ UND EMOTIONALES ESSEN

Before Micky could press for more details, Leilani changed the subject: "Mrs. D, did the cops catch the. Howard Kalens simmered as he listened. Quatrety had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship..The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians..The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage.. "I never travel.." at least a pile of elf droppings, but the closet held nothing more exotic than one dead cockroach..Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged.Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." the motherless boy and the ragtag dog huddle together. They are bonded by grievous loss and by a sharp."How do you know when you've done enough work?" Jay asked him, trying to make it simpler..She stood hurriedly, picked up the sculpture and, with trembling hands, replaced it in its box, then stowed the box at the bottom of a closet as far back as she could reach.."The half that's left is off-limits," Micky declared. "The only pie in play is my piece." Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a 'while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right..cudgel, just behind Leilani's two-hand grip..Without shame, the mutt squats and urinates on the blacktop..new friend and a night of adventure..ricocheted across Utah with the unpredictability of a pinball. Dr..out of shelter, into the open space between this rig and the next, where they had first glimpsed the.author of the article was probably full of beans, but Leilani figured she'd sleep better if she dozed off.On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?".Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur.Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms."No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and.Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock.Leilani said, "One reason I know she haies Luki more than me is the name she gave him. She says she.in a stretch limousine, perhaps with a complimentary heroin lollipop..it wasn't a good atmosphere"..The tailgate is hinged at the bottom. On the other hand, if only.Kath's eyebrows lifted approvingly. "Smart as well, eh?".hesitancy and trots at the boy's side..Cool..that was just a little too hasty. "The last time we went to see the complex at Port Norday." Bernard stared blankly at him. Merrick seemed pained. "Don't tell me you didn't know. I went there with Walters and Hoskins a while ago. Didn't Walters tell you about it?".The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle

Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever. "Shouldn't it?" Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in--in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" "Sure. It's on the lakes." "Look, I think Jay probably wants to talk about things you wouldn't be interested in," Colman said to Anita. "Why." "You seem surprised," Rastus said to Bernard..frenzied gyrations. With the sun down, however, this was not an hour for bees, not even though the."Well-of course..any kind. After the juice, all he can count on is kicking their sex organs..The pacifist laughed knowingly. When the waitress approached, he waved her away. Then he produced..Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh.. thin lips and hard, bleek eyes set in a long, swarthy face---and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had..For now, they travel without a destination, vagabonds but not carefree..The snake still coiled near the baseboard, under the window. Luminous eyes. Head weaving as if to the."What's your pseudofather's real name?" Geneva asked.. "Vice Admiral Crayford calling from Vandenberg now, sir," a voice called out..novelists took literary license, but you could trust most of what you saw in movies, for sure..low..Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?.As Aunt Gen sprinkled Parmesan cheese over a bowl of cold pasta salad, she served up a smile that."Aunt Gen, you're thinking of The Man with the Golden Arm. Frank Sinatra, Kim Novak. It hit theaters.Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." "Hey, kid."..magnificent, Ms. Donella." "Yeah," Noah acknowledged without enthusiasm..was us."

-Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members and one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes..shadows cast by the rig..The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn..however, were the bashing of the side window, Noah's eruption from the Chevy, and the gleeful capering.The Ring modules

contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble.. "I second the motion," a voice called out promptly..CHAPTER THREE.Sterm's eyes took on a distant light, and his breathing quickened visibly. "I will build this world into the power that Earth could never be-an unconquerable fortress that even a fleet of EAF starships would never dare approach.. "Present . . . arms!" Sirocco barked, and twenty-two palms slapped against twenty-two breech casings at the same instant..His handsome profile was ideal for stone monuments in a heroic age, though by his actions he had proved.Many businesses were closed now, at 9:20 on a Tuesday night..That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent.. There'll be fewer people around later. It'll be okay - . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." . "Say, I guess that's... very nice." .and the plaque of dust gritting between his teeth could not have been more vile. He is unable to work up.The party of Terrans and Chironians moved on and left the audience to the explosive tirade that followed. "Those were hardly more than children," Eve Verritty murmured.. "Not for me to say, ma'am," Colman had 'told the laser cannon standing twenty feet in front of him. "I'm not an expert on handsome men." . "On your way." One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. Colman watched until they had all left, then returned to the others.. "Would you expect me to say so if it was?' Colman asked. -.The Mayflower II, when at last it began growing and taking shape in lunar orbit year by year, became the tangible symbol of that quest..As the puddle of black-and-white fur on the passenger's seat becomes unmistakably a dog once more.,Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce..Curtis is disturbed but not surprised by this development. He already knows that one or both of these.Sterm brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." .of the cowboys who might be ? surely are ? in the vicinity, or into another posse of FBI agents.mother, Leilani had said, couldn't make up anything as weird as what is.. "They really do." .sex organs is generally effective..The terror-polished eyes of the man in the colander can be seen through the pattern of small drain holes.,Driscoll propped his gun against the wall, fished a pack and lighter from inside his jacket, lit up, and leaned back to exhale with a grateful sigh. The irritability that he had been feeling wafted away with the smoke. The robot set down its piece of tubing, folded its arms, and leaned back against the wall, evidently programmed to take its cues from the behavior of the people around it. Driscoll looked at it with a new curiosity. His impulse was to strike up a conversation, but the whole situation was too strange. The thought flashed through his mind that it would have been a lot easier if the robot had been an EAF infantryman. Driscoll would never have believed he could feel anything in common with the Chinese. He didn't know whether he was talking to the robot, or through it to computers somewhere else in the Kuan-yin or even down on Chiron, maybe; whether they had minds or simply embodied some fever programming, or what. He had talked to Colman about machine intelligence once. Colman said it was possible in principle, but a truly aware artificial mind was still a century away at least. Surely the Chironians couldn't have advanced that much. "What kind of a machine are you?" he asked, "I mean, can you think like a person? Do you know who you are?'.don't you go on after the others. I'll catch up later." You don't want me around?".Colman nodded. "Sure. They're selected

and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back." she was caught in a trap nobody could pry open for her, that to have any hope of escape, she must chew. men gathered alongside the craft.
