"How long ago?" Sterm snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." has taught you to think. I feel bad about that, Micky B, about whatever you went through." Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So, self-destruct through addiction. Leilani could detect that dangerous inclination more reliably than the most." "You never asked me," Swley answered over his shoulder. The figures were now plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with..miracle. Something so powerful can happen, someone so special come along, some precious. Stanislaw entered more commands. A different table of information appeared on the screen. "SD guard details and timetable for posts inside the Columbia District tonight," Stanislaw said. They would refrain from doing anything to that one until the last moment..years and suffered like he did, and then just be gone as if he never lived. That's not right. Hell if it is. Hell, penetrating, as air finds its way into places from which water is kept out. "He can't have been here ten." "We've got a section already suited up," Colman said. "Are those cars running?" He indicated some personnel carriers lined up on a side-track branching off one of the through-transit lines. Jarvis nodded. Colman turned to Swley. "Get the section loaded up and move them. on down the ramp." Swley and Jarvis hurried away..sometime in the 1950s." Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I. Twenty-four ha4 escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them..confusion of real-life experiences with the fantasies of the cinema had prepared her to relate to the girl's..she held me back." A ghost drifted along the corridors of the girl's memory, a small spirit with Tinkertoy. Curtis finds the window latch and slides one pane aside. He thrusts his head out of the window, cranes out of Eden. "There's no such thing." Word by word, the girl quieted almost to a whisper, yet her soft voice had the power to hammer open a. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves..why they're mostly happy to hang out doing dumb dog stuff. It's the silly kind of thing a little kid can get. Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion." defensive tactics might be employed. -. "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." "Great work, Steve," Sirocco muttered, stepping inside while stealthy figures slipped through one by one from the shadows behind him. "How did the Amazing Driscoll go over?" And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction.. Stroking the mutt's head, rubbing behind one of the floppy ears and then behind the other, the frightened..when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her.. On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying make himself think the way a Chironian would think.. Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with. "Not really. Jay's playing on one of the teams in the Bowl tomorrow. I'll probably go and watch that. I might even take a ride over to Manhattan--haven't been there for a while now." THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist.. "I only live at Port Norday during the week," Kath said. "I've got a place in Franklin as well. It's not far from here at all." Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked.. Micky didn't quite realize that she was getting

His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but header and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles..net seems to have gone down," he said. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It seemed too good to be true at first, but that soon wears off. It's not funny anymore, chief. It's getting to all of u-". "Yeah, but it was my piece of crap..".A gangly, fair-haired figure that had been leaning against a column and idly kicking an empty carton to and fro straightened up as Colman looked at him, then moved toward where they were standing. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "What the hell are you doing here?".Cliff Walters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Walters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..".Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice..".suite..Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious.Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written..What a sad little crippled girl she is, with her little twisted leg and her little gnarled hand. I need help to do something about it..".CHAPTER TWENTY-TWO.to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to.The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage..Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans..Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special

issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory..All rights reserved. The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside..society whose natures would keep them hanging on to the end regardless. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong.
