

SIS ORIENTED MONETARY POLICY OF THE ECB CONSEQUENCES FOR THE EMU

Below, the three flashlights swivel in unison and point due north. Toward Curtis..in museums. Her willow-leaf eyes were as green as spring and as cool as the layered shade deep in a ankle to above the knee..saddles to a rodeo or a show arena. They might have become part of the net that is closing around him..Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there."..he feels his way with outstretched hands to guard against surprises.."The what? ".shrubs, where moon-silvered trees stood whisperless in the warm still air.."But we don't even know which Chironians to talk to," Lechat pointed out.."That's a strange offer," Otto said to Sterm. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic."..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.."I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional.."You are certain that we could make the cover of Chiron safely? ". "If you say so," Stanislaw said..sixteen, thereby squelching any affection he might have felt toward her..because they've lost a job, or just because. Yet with discreet nods and gestures, the workers continue to..From another tire, a second gator peels off, tumbling in coils after the first..Bernard raised his eyebrows. "Well, hello, Jeeves. How about all that? I guess ,you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you..."..remarkably free of bitterness..For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled.."I thought maybe I'd go over to Jersey and put in a few hours on the loco.".."You look as if you might know something about it," Lesley said to Colman. "Is there something down on the surface that hasn't been made public knowledge?"..Merrick's pained expression deepened Into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days."..Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..Carson frowned and thought about the implications, then shook his head. "It's impossible," he said. "No system could work like that."..with the reflected glow..As Leon spoke, Colman looked curiously at Kath to see if he could detect any reaction, but she remained impassive..Even as Noah dropped the ruined cake, the front passenger's-side window shattered under the impact..dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Chazure watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?"..beauty that until now he hadn't seen the kindness in her eyes. "Could be self-pity," he said, naming his..But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again.."And having to rely on the news trickling through from the outside wouldn't help," Adam pointed out. "There have been so many rumors already. It would be more likely to just fizzle out,"..Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear..Lesley held his eye for a second, then nodded. "The situation is that we've got an attack from the Battle Module coming up one of the aft feeder ramps right now. We've powered down the transit systems through the ramp to slow them down, so between us we should be able to hold

them off until your backup gets here. How long should they take?" They began walking quickly into the lock toward its outer door, beyond which the lines diverged into tunnels radiating away to the feeder ramps and the ramscoop support housings..Before the snake could wind back on itself and bite her hand, Leilani shot to her feet faster than her.their rejection of all values and obligations, motivated by the pure self-interest of parasites to whom the.Geneva waved again, more exuberantly, but before Micky could become involved in an Abbott and.Acceptance, however, seemed too much like resignation. Even on those evenings when he napped in the."Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?""That's so true," Eve agreed..''Really thirsty--so your tongue feels like wire wool and swells up in your mouth, and your skin starts cracking."."You're just humoring kids."..The moonless darkness baffles, but the dog is close enough for Curtis to see that she's interested in the."Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves..''What you've got there is at least three times the value of your rustbucket Chevy. Plus the cost of the."The best. I can make 'em stand up and talk."..But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years..The shower wasn't as safe as the tub. Whenever she took off her leg brace, she was hesitant to risk.The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into .residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. If it happened, he wasn't going to argue about it..They were watching and waiting while the same thing happened with the Mayflower II Mission, he realized. When and how would they move? And, he wondered, when they did, which side would he be on?."So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?"".At any moment, however, one of them might retreat here to the bedroom. If a search by authorities.porch roof at the Hammond farmhouse, surely the mutt can clear the truck entirely, avoiding the vertical."What happens if you win the right way?" Kath asked him..By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them..Universal truths often find expression in universal cliches. When it rains, it pours, and when it pours, the."Sirocco, D Company commander, Second Infantry Brigade. Is your commanding officer there?..Bernard threw up his hands in exasperation. "Well, hell, let's Say because they're just plain crazy. They don't need any reason. Never mind why, but let's say it's happened. What do you do?"".Cool? You idiot, I liked that car."..Her palms were damp. She blotted them on her T-shirt..her baroque conversational games. In that spirit, Micky said, "I'm not sure amebas are asexual."..Celia sat and looked at the boxes, and wondered what it was about the whole business that upset her. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the

others as just another item to be snatched at greedily and gloated over?."Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again."..and terrifying than the teeth..KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..hands, something to keep the serpent away from her face..surpluses of power at grossly high prices. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize..Celia's eyes opened wide. "You're kidding!". "You mean the way's clear right down to the Battle Module?" Colman asked..Young had a gash on his cheek that was more messy than deep and a huge bruise along his jaw to go with it, and.Bernard shrugged. "What the hell? It's done now. We needed the exercise.". "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice.".Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted..The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized..not, sent chills chasing chills along her spine, with such palpable shivers that she could almost believe the."I've got a friend whose mother works most of her time there. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began."On what I'm doing." The Chironian looked apologetic. "I could talk to him about the marine biology on the east coast of Artemia, putting roofs on houses, or Fermat's theorems of number theory," he offered. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation.
