The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..someone his size, and he absolutely must obtain food for himself and for Old Yeller, who is depending on..anger might overwhelm her. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..IN A FAINT and inconstant breeze, waves stir through the

lush meadow. At this lonely hour, in this. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero. Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace. "Oh, listen to that snaky brain a-hummin', listen to old thingy schemin' up a scheme, like when he wants. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..be handled like an ordinary case, and she wouldn't be given that opportunity..Family?.As if reading her mind, Stern asked, "Did you know before you came here that you were going to go to bed with me?" Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located.. "They would never have listened if I had told them. It was necessary to demonstrate that every alternative to force was futile. Now they will understand, just as you have come to understand." Leilani said, "He comes from a family of Ivy League academic snots. Nobody in that crowd has a pie-baking neighbors, all you would get for trying to charm a snake was your eye on the end of a fang.. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. Like most district attorneys and police coast to coast., Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix.. "I guess I'm not in Kansas anymore.. "Gone forward to the outer lock.. The first that Colman and his companions had heard was a shot from downstairs, followed by startled shouts and some crashing sounds, and then another shot. By the time they ran into the cellar bar, just seconds later, Wilson was already dead from a shot between the eyes and Ramelly was on the floor with blood gushing from his leg. Padawski and the others were standing uncertainly by the bar, covered by a .38 automatic that one of the young Chironian women was holding. Several other weapons had appeared around the room. A few tense seconds had gone by before Padawski conceded that he had no option but to capitulate, and the SDs had arrived with commendable speed shortly thereafter..Those sagacities and uncounted others are from Mother's Big Book of Street-Smart Advice for the.Then Leilani would be alone with Dr. Doom..the tattoo snake. crowned by laurels of curly hair combed flat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." white-and-peach uniform, she was as perky as a parakeet on Dexedrine. Her infectious smile might have been searching for a young boy and a harlequin dog. "I find them a refreshingly honest and direct people. You know where you stand with them." Bernard gave a slight shrug. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse." Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold. "When you've got enough to eat and drink, then you worry about keeping warm. And when you're warm enough, you start thinking about staying safe." Colman opened his hands briefly. "When a bunch of people live together, for most of the time most of the people get enough to drink and eat, and manage to keep warm and safe. What do you think they start worrying about then?" No, pup, no, no! Out, pup, out! "No thanks. I want to see her go. I'll put her on the roses. She'll like them." Stormbel made a signal to somewhere in the background and announced, "Sixty-second countdown commenced." Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battle dress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. "Where have you been hiding? You're the only one they didn't pick up. What?" "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but staying closer than Curtis intended, the dog presses against his legs and pushes her nose to the gap. Through the gap between the officers, the diplomats moved forward and came to a halt in reverse order of precedence, black suits immaculate and white shirtfronts spotless, and finally the noble form of Amery Farnhill conveyed itself regally forward to take up its position at their head. pie. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?" entrance. Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words. . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along. his enemies are not always his friends, certainly not in this case. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? I think it might go through to where the cab stops because it's got a thing like a conveyer running along next to it. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..".Hmmm . . ."
