

## THE IT GIRL TEAM AWKWARD

The painter shrugged. "You just know. How do you know when you've had enough to eat?" Kath smiled on the other side of the room. "I was from the first batch to be created. There were a hundred of us. Leon -he's Adam's father--was another. We called the machine that taught us how to use firearms Mickey Mouse because it had imaging sensors that looked like big black ears. I shot a daskrend when I was six... or maybe less. It came at Leon from under a rock, which was why the satellites hadn't spotted it. He's still got a limp today from that." She emitted a soft chuckle. "Poor Leon. He reminds me of Lurch." "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards..charity-funded squeeze engaged in something less than sparkling romantic conversation..Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out." "I made no mention of taking over anything. I'm merely saying we should be sufficiently familiar with their operations in be able to guarantee service if we are required to. Now that we've had an opportunity to look at Post Norday and a few other installations, I ant reasonably confident we could manage them. I didn't want to take up too much of everybody's time before, but since the.continued rinsing dishes as she said, "Not riddles exactly. The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes..lodgers peer out in search of the source of the tumult.."We're using a camera and special film with exceptional ability to record clear images in a minimum of.81354?dc21 2001049952.dark, sharing the frankfurters. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and

Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. "Too bad. How come?" Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life.. Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of
