am I saying? That's petty. I don't like him, but he's right" She stood up, puffing out her cheeks as she. You are five, hiding in a place only you know. You are covered with bark dust, scratched by twigs, sweaty and hot. A wind sighs in the aspen leaves. A faint steady hiss comes from the viewer you hold in your hands; then a voice: "Lone, I see you?under the bam, eating an apple!" A silence. "Lone, come on out, I see you." Another voice. "That's right, she's in there." After a moment, sulkily: "Oh, okay." "I did not like that idea, either, but ... "What else can we do? Shall I lie to Amanda and hate you for making me do it?" She winced. "No." "you know. It's difficult to verbalize. He has such an incredible innocence. A lost, doomed look that Byron. you get the last one, you will have done very well indeed." "That must be where you got your gift of gab. You must have kissed the Blarney stone." The grey man looked after Amos until he disappeared. Then he put his hand on his head, which was beginning to throb a little, and leaned against the black trunk which had been carried to the deck. "Oh, all kinds." He shrugged. "Fantasy mostly." Barry popped the tops off two beer cans and Madeline swept an accumulation of books and papers off a tabletop and onto a many-cushioned bed. They sat down at the table. The cracks opened. "Oh, yes. Fifty years from now our understanding of controlled-fusion processes will probably have eliminated that source of shortages too, but in the meantime shorter sighted political considerations are recreating the climate of tension and rivalry that hinged around the oil issue at the close of the last century. Obviously, South Africa's importance in this context is shaping the current pattern of power maneuvering, and the probable flashpoint for another East-West collision will again be the Iran-Palestine border region, which our strategists expect the Soviets to contest to gain access to the Indian Ocean in preparation for the support of a war of so-called black African liberation against the South." "All right. But the fact remains that you're the closest thing on Mars to a pilot for the Podkayne. I think you should consider that when you're deciding what we should do." He shut up, afraid to sound like he was pushing her. Get Out of My Way! Get Out of My Way!, HARRY HARRISON. Marvin Kolodny, Ph.D. in cubicle 183. The initials worried him. He could have coped, this time, with the old fuddy-duddy he'd had last August, but a Ph.D.? It seemed as though they were raising the hurdles each time he came around the track. But his worries evaporated the moment he was in the cubicle and saw that Marvin Kolodny was a completely average young man of twenty-four. His averageness was even a bit unsteady, as though he had to think about it, but then most twenty-four-year-olds are self-conscious in just that way. "No, I wouldn't say so." very peculiar. Last Tuesday, the 26th, a girl had cut her wrists with a razor blade In North Hollywood. Crawford ran his hands through his hair, wondering what to say. That possibility had been discussed, and was being studied. But it had to be classed as extremely remote. that, and Lang was wondering if it was too often. The place was crowded, and the kids were nervous. Then, in his deer heart, her brother would know the day's enchantment was at an end and run swiftly home. There, at the lintel over the cottage door, he would rub between his antlers till the hide on his forehead broke bloodlessly apart He would rub and rub fur-flier still till the brown hide skinned back along both sides and he stepped out a naked man. then it's back to the audience and into the song she always tops her concerts with, the number that really made her. Tharsis Base sat on a wide ledge about halfway up from the uneven bottom of the Tharsis arm of the Great Rift Valley. The site had been chosen because it was a smooth area, allowing easy access up a gentle slope to the flat plains of the Tharsis Plateau, while at the same time only a kilometer from the valley floor. No one could agree which area was most worthy of study: plains or canyon. So this site had been chosen as a compromise. What it meant was that the exploring parties had to either climb up or go down, because there wasn't a damn thing worth seeing near the camp. Even the exposed layering and its areological records could not be seen without a half-kilometer crawler ride up to the point where Crawford had climbed to watch the sunrise. "Okay," I said, but I -wasn't entirely convinced. Why would anyone deliberately and brutally murder. I had seen enough, more than enough- I opened the door and stepped out of the closet. "It's Amos!" cried Hidalgo, running from behind the counter. all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer. He pulled a piece of green silk from his pocket, went to the First, there is the reactive pain. Only those who have reviewed, year in and year out, know how truly abominable most fiction is. And we can't remove ourselves from the pain. Ordinary readers can skip, or read every third word, or quit in the middle. We can't We must read carefully, with our sensitivities at full operation and our critical-historical apparatus always in high gear? or we may miss that subtle satire which disguises itself as cliché, that first novel whose beginning, alas, was never revised, that gem of a quiet story obscured in a loud, flashy collection, that experiment in form which could be mistaken for sloppiness, that appealing tale partly marred by (but also made possible by) naivete, that complicated situation that only pays off near the end of the book. Such works exist but in order not to miss them, one must continually extend one's sensitivity, knowledge, and critical care to works that only abuse such faculties. The mental sensation is that of eating garbage, I assure you, and if critics\* accumulated suffering did not find an outlet in the vigor of our language, I don't know what we would do. And it's the critics who care the most who suffer the most; irritation is a sign of betrayed love. As Shaw puts it: for skating. A clone is any organism (or group of organisms) that arises out of a cell (or group of cells) by means other than sexual reproduction. Put it another way: It is an organism that is the product of asexual reproduction. Put it still another way: It is an organism with a single parent, whereas an organism that arises from sexual reproduction (except where self-fertilization is possible) has two parents..
