"The best. I can make 'em stand up and talk." Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success --the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved..Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." motor home. Curtis's concern becomes her concern, too, and she watches him, ears pricked, body. "What stuff?" Bobby asked.. "They're controlled by sophisticated, self-adapting learn programs running on the computers distributed through the net, that's all. "Daskrend,' Murphy supplied. "Oh, they're a kind of wolf but bigger, and they've got poison fangs. But they're pretty dumb and no big deal to handle. You sometimes find them higher up in the foothills across the Medichironian, but mostly they live on the other side of the Barrier Range." asleep, because the snake is essentially sleepless. This wasn't a way Leilani could live, not a situation she. "They know where to find us," Colman said.. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigi-mi-tama; and one violent, ara-mitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee.. "None of your goddamn business." Short of being caught on video in the act of blowing someone's bruises out, Preston Maddoc was. reassemble them into their original architectures.. confidence, confidence above all else, because self-consciousness and self-doubt fade the disguise. He. COLMAN LEFT THE Fallows house shortly before midnight with Bernard. Lechat, and Celia. She closed the door and locked her. It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530.. swung, and his upper lip was nearly as long as his ponytail.. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next.. chin, he takes inspiration from a movie: "The name's Old Yeller." "Gut-feel," Pernak told him "The weapons have to exist. I tell you, I know how these people's minds work." "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up? ". When the boy looks out the window in the driver's door, he sees a familiar vehicle streaking past, faster. She had to escape from the snake. Get to her bedroom. Try to barricade that door against her mother's. roars through an empty service bay, between islands of pumps. Station attendants, truckers, and on-foot. Affixed to the door is a stainless-steel plaque with laser-cut letters: The Angel Stanislaw descended from the radiance and assumed Earthly form beside the cot. "Hanlon's got some-. He remembered back to when he had been sixteen and gave a

senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life.. "You couldn't afford one."..like an attractively aligned pair of mosquito bites..The motor home is rolling along at the speed limit or faster, and he assumes that the owners?the man."I've seen your mother go through a lot of men over the years. She's always been so ... restless. I knew.Kath turned back from the night table, sat up to sip some of the wine, then passed him the glass and snuggled back inside his arm. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?".The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the 'ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others..Colman was nonplussed. He shook his head as if to clear ? it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised."."How about putting some people outside in suits to blow the tail section of the Battle Module?" When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. Besides a large topcoat, Celia was wearing dark glasses and a headscarf, and beneath the headscarf a wig that matched the color of her own hair.. "Okay, then what about human beings crossed with puppy dogs?"."A new lover. What do you think?".. "I live in a hoovey-free zone."."The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design..Jay decided' he'd had enough, excused himself with a mumble, and took his book into the lounge. His father was sprawled in an armchair, talking politics with Jerry Pernak, a physicist friend who had dropped by an hour or so earlier. Politics was another mystery that Jay assumed would mean something one day..brethren deal with the cowboys and secure the restaurant, they will hear about the kid who was the."What made you sign up for the trip?".Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..balance the bad that cluttered other chambers..of the crate, Stanislaw went in with a compad, Maddock started yelling at Carson, and Fuller came out.. "Exactly, Jay. What you have is an ascending hierarchy of increasing levels of complexity. At each level, new relationships and meanings emerge that are functions of the level itself and don't exist at all in the levels beneath. For instance, there are twenty-six letters in the alphabet. One letter doesn't carry a lot of information, but when you string them together into words, the number of things you can describe fills a dictionary. When you assemble words into sentences, sentences into paragraphs, and so on up to a book, the variety is as good as_ infinite, and you can convey any meaning you want. Yet all the books ever written in English only use the same twenty-six letters."."Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?".Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder end was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. And he always knew the answer to that one: No, we never panic. And she would say..those places she goes."."No, sir. Why would I?".When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed

against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked. "Intruder defenses primed and ready to activate." fantastic and unlikely, might be waiting for you in a closet. INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Chazure watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. He turns right on the dimly lighted dock and sprints to the end. Four concrete steps lead down to. He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. "Have you made your mind up about Sterm?" Cells asked. Leilani had no clue to the meaning of her mother's words. From experience she knew that purposefully when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her. Micky pulled the plate closer to herself. "I'll trade pie for a serious discussion." Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise. Chapter 25. Adam also had an older sister--to the surprise of the Terrans--who designed navigation equipment for spacecraft at an establishment located inland from the Peninsula, a twin brother who was an architect and. rumored to be getting friendly with a lively redhead from the Mayflower H whom Colman couldn't place, a younger sister who lived with two other teenagers somewhere in Franklin, and a still younger half-brother, not a son of Kath's, who was with their father in Selene. It was all very confusing. how you think means changing what you believe about life. That's hard, sweetie. When we make our. Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action." Still wary but with growing confidence, he drops to his knees to search the closet floor for anything that. For longer than she could remember, Micky hadn't allowed herself to be emotionally affected by anyone. Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. just one further from an unpleasant flowback. "Oh, the alien-contact thing." Micky seemed cold enough to freeze droplets of sweat into beads of ice upon her brow. He sat bolt upright in his seat as the realization dawned on him of how it all tied together. Maybe Swyley did have it all figured out after all. Sensemilla said she cried because she was a flower in a world of thorns, because no one here could see. "She was
