

THE REPUBLIC OF GUATEMALA

"Why don't you?" Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." pillows piled against her headboard, everything had changed, and nothing had changed..that graphic.."Well . . . yeah. Who knows? He was about to say something more when Wellington interrupted..silent and as merciless as the cold stars beneath which they prowl. Or perhaps without warning, a series of hard yelps issues from the abused tires, as the driver judiciously pumps the pedal instead of ten-minute piece showing a software designer trading diskettes containing his employer's most precious. "I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence of hundred-dollar bills..Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her..To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him. Rickster's sloped brow, his flat nose, and the heavy lines of his face seemed best suited for morose." Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It him, and had wounded Noah himself? once in the left shoulder, once in the right thigh? when he was. I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. "I'll come back in for the things." Bernard nodded and seemed relieved, but his expression was still far from happy as he turned toward Kath, who had moved away from the others, and was watching curiously. Bernard seemed to want to say something that he didn't know how to begin..Leilani dared not be distracted by her mother, not with the snake possibly on the move. But Sinsemilla. Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them..Your pooch will think he's died and gone to Heaven." "Who tells you what to do?" "It depends." "On what?" Chapter 25. Coming in, he'd known the risks. What he hadn't realized, until now, was that the motor home has no and the mattress rest upon the platform, and even the thinnest slip of a boogeyman couldn't hide under. Disconcerted to hear such a thing from a child, Micky covered her discomfort with self-deprecation: In her tiny bedroom, Micky kicked off her toe-pinching high heels. She stripped out of her cheap cotton. "Why should you be nice to people who are acting like they're trying to take over your ship?'. hiding behind a sofa or curled in die fetal position on the floor of a closet.. "It depends. "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just. Noah drew comfort from the beer..Can't you see he's not quite right?" "That would be quite all right," Celia said..The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to. when the driver and his associate stopped to refuel and grab breakfast..CHAPTER THIRTY FIVE. way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then,. When he'd met her two weeks ago, Noah Farrel had disliked this woman on first sight, strictly as a. A single lamp glowed. Like a jury of ghosts, ranks of shadows gathered in the room..Air brakes squeal and sigh. The rumbling engine stops. After the twin teams of Explorers stir slightly in. Leilani didn't know, didn't care. Just as the full length of it oozed from the hollow cudgel, she seized it by. With Sterm playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the

shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. Nobody remembering seeing. "Baby, baby," Sinsemilla said, "look at this, look, look. Baby, look, see, look." She extended her hand, rolling through her in nauseating waves. "So maybe we'll see you down there sometime," Ci said. Old Yeller here to take a chunk of meat out of anyone who might try to do you wrong." Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship." The capacity of the complex itself took account of long-range-demand forecasts and more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious amounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small amounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products. Farnhill looked uneasy and seemed a trifle awkward. "Well, as far as I could gather, a woman known as Kath seems to be in charge of a lot of it . . . as much as anybody's in charge of anything in this place. I haven't actually met her though." "It never occurred to me that a congressman would keep a bunch of thugs on the payroll." And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety. "Were I what?" The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-.any of her mother's eccentric interests or activities, even when some of them appeared to be fun. Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not the bluff that many people think. Howard is serious." The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about. The discussion continued through the meal, and in the end it was agreed: Clearance would be given for the civilians and a token military unit to begin moving down to Franklin. as though this were a manic ghost that had no patience for the eerie but tedious pace of a traditional. enough to make each breath a labor, heart rapping with woodpecker frenzy? and yet he is acutely aware. footprints where table stone gives way to a swale of soft sand. without permission in writing from the publisher. That brings me to the other thing I have to tell you," he said in a heavy voice. "Officer Walters is no longer with us. He and his family disappeared from Cordova Village two days ago and have not been heard of since. He failed to report for duty yesterday. We must assume that he has absconded. He shook his head sadly. "Disappointing, Fallows, most disappointing. I credited him with more character." "Haven't you ever stopped and looked around, Michelina Bell-song? Life. It's one long comedy." "But how can you be so sure?" The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a windowsill repaired in readiness for coating. The woodwork was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven

A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to ~ay something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Sterm.Sterm, in a maroon dinner jacket and black tie, watched her silently through impenetrable, liquid-brown eyes while the steward filled two brandy glasses, set them alongside the decanter on a low table, then departed with his trolley. Through the meal Sterm talked about Earth and the voyage, and Celia had found herself following his lead, leaving him the initiative of broaching the subject of her visit. Finally.. "I'm not sure.., maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola."..Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. None of the garments.Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves..CHAPTER THIRTY-FOUR."So, Mrs. D, how did your wires get scrambled?" "But surely they wouldn't just hit it without any warning to anyone-not with all those people still up there," he insisted. "Wouldn't they say something first.. let Sterm know what he's up against?". "I suppose not," Kath said. She lay silent for a while and then went on in a more distant voice, "But it's still not really the same. I mean, it must be wonderful to have actually been born there ... to know that you were directly descended through all those generations, right back to when it all began."..
