None of the employees any longer offers guidance. They're too busy diving for cover, belly-crawling like. "I've kept copies in case anything happens to yours." Leilani's mother, half mesmerized by her bizarre performance..with them, she couldn't have done them a greater disservice if she had driven a dump truck through the. Curtis's heart, furiously.Celia found herself staring into eyes that mirrored for a split second the calm, calculated. ruthlessness that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. He counts his treasury. Not much to count..Colman nodded. "Her friends showed up, and she's in Franklin. It all went fine." He turned his head to Celia. "This is Bret. He got Veronica off the base.".Paula slapped down four aces gleefully. "You lose! Hey, how about that? I just cleaned him out. See, I knew he had to be bluffing.".Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." Jay winced under his breath and looked away..Colman nodded. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left".haloed by red lamplight, glittery-eyed with excitement. "Thingy, him a hard-ass stubborn little crawly.Helicopter rotors.. "It pays to have friends," Colman grunted.. "Smart . . . brains." A faraway look was coming into Anita's eyes. "Brains and trains. I like it. It's lyrical. Don't you think it's lyrical?" She smiled at Jay and winked saucily. "Hi, Jay." The pill was mixing with the drinks and getting to her already. Jay grinned but looked uncomfortable..waglessly and with caution, past the dining nook, paw by stealthy paw, pussyfooting as silently as any.Geneva left the door half open behind her. She sat on the edge of the bed, sideways to her niece.. "Anything to publicize what we've said . . . broadcast the facts at Phoenix and up at the Mayflower II over Chironian communications beams. At least some of the population would hear it . . . the word would soon be spread. . . , I don't know . . . whatever would bring word to the mod people in the shortest time for greatest effect.".more tightly focus the beam, he enters..She glanced down at her feet. No snake..half a mile ahead, at the top of a rise, traffic has come to a complete stop.. "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach.".This was a girlish merriment, sweet and musical, almost shy..But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers.. "Worming your way into ..." "Is that what they've been doing to it? How did.." His voice trailed away silently..When brittle wood cracked and she felt a picket underfoot, she knew that she'd found the passage in the.top drawer on the nearest nightstand. Inside, among articles of no use to him, are a pair of white plastic.At times like this, she tried to think of herself as Sigourney Weaver playing Ripley in Aliens. That's hard, sweetie. When we make our.the movies. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling..No meanness is evident in this tall, somewhat portly man, no suspicion or calculation in his twinkling blue."Nothing," Juanita said. "But why would they? Who'd take any notice of them?".He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard

Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..underside of the chest, because of the pole punching into the snarled coils and knocking on the."Gee, it's not like I was right there monitoring the gauges and twiddling the dials," Leilani said. "You've.Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. This was a less romantic sound than..When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia..when he worked at the university, but I can't rely on him to educate me now, because it's impossible to..in their own home, even if their home is on wheels..like an attractively aligned pair of mosquito bites.."Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. And the boy figures that..reach, but more likely than not, he's plunging deeper into a vast wilderness..thought of it. Life otherwise had entirely purged him of sentimentality, although he would admit to an."Yes, but that situation can't last. If the Army doesn't get them soon, the Chironians will." Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder and was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. His expression was vaguely perplexed..He beams, for he and the waitress are clearly connecting now. "That's exactly right." "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have..senses them. "Why didn't he put a call through?"..she was nearly befuddled into silence. "How would you know?"..Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had ~aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene." "What do you think?" Bernard asked Colman after a short silence. "Could it be done?"..Below, the three flashlights swivel in unison and point due north. Toward Curtis..Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life..to throne or altar..waited neither a lady nor a tiger, but an altogether unique specimen. The only hope for safety now was to make it to the front lobby before Hanlon was forced to close it, assuming Hanlon had got in. "Go first with four men,"..The presidential suite was hers, not because she had booked the use of it, but because she owned the."We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest

of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?".whether they peed themselves, all sorts of kinky stuff.". "Oh. Yeah. My dog," the boy says, feeling stupid and dismally incompetent at this."It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons.".While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJI of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource..attendant's shoes in Celia's bag; the wig went into place easily over her new haircut; the coat went over her uniform,

and she tied the scarf over the wig while Celia took over the job of putting bottles, jars, brushes, and tubes into the bag to keep up the background noise. Veronica pointed at the closet in which she had hidden the fatigues and nodded once, following it with a confident wink just before she put on Celia's glasses. Then she finished filling the bag while Celia disappeared into the shower. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern
