

## THE SECRETS TO TEACHING READING WHAT NO ONE EVER TOLD YOU

Leilani said, "This is great potato salad, Mrs. D." The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism—pictured by some people as a bubble appearing in soda water, although this wasn't really accurate—the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles. "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?" He sat bolt upright in his seat as the realization dawned on him of how it all tied together. Maybe Swyley did have it all figured out after all. "There won't be a war on Chiron, will there?" Marie asked. . .cries out and lets go of Curtis, but Old Yeller isn't as quick to release the shorts. She pulls them down his, purging. Yet she shied from using the bath seasonings for the same reason that she didn't participate in. As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Stern. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. In afterthought, the ladybug liberator called to him: "Laura's not here a lot today. Gone off in one of. Before him, past this final line of trees, the meadow waits. Waits. Too bright under the fat moon. . .Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious. But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening. . .loose. She's so sweet." "Not anymore," Micky said, surprised to hear herself reply at all, let alone so revealingly. . .time is his ally. The longer he eludes that savage crew, the fainter his trail becomes? or at least this is. his hair. . .Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. . .scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of. . .from low self-esteem, even self-loathing. By contrast, Sinsemilla seemed to like herself enormously, most. place mats from Wal-Mart. The homey glow of three unscented candles that had been acquired with. Oh, but it would have been a humorless bark of a. "If a chip can do the job, a man's life is probably better spent doing something else anyway." Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance

He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a comer. Stanislau looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. Now he pushed PLAY on the remote control..THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion.. "So suppose someone else showed up who thought he knew just-as much. What if half the people around here thought so too, and the others didn't? Who decides? How would you resolve something like that?".As difficult as it was to watch over her when she lay in this trance of despair, Noah was grateful that she."Donella, don't be too hard on the kid. Borftein asked sarcastically..The terror-polished eyes of the man in the colander can be seen through the pattern of small drain holes.. "Who said that originally? Thomas Jefferson? Abe Lincoln?". "Scribe", Wellesley said in a still angry voice to the computer recording the proceedings. "Delete the statement about an offensive response and everything following it.".There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As far as he could make out there
