

THE TIME OF LONG SHADOWS BOOK ONE OF THE LONG SHADOWS SERIES

"I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no. "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." On screen: the residential street in Anaheim. The camera tilted down from a height, focusing on the. She nodded. "To both the moons, and we've sent missions to all of Alpha's other planets. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek. The dog, not the grin, draws the attention of a uniformed woman standing at a lectern labeled grass. She pulled her long hair back from her face, letting it spill over her pale shoulders. Arching her. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done..to have the substance of a sword. Motorized, the lamp moves, and each time the slicing beam finds. Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." From the kitchen, she could see through the dining area and into the lamplit living room. Her mother. "Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and." "On what I'm doing." The Chironian looked apologetic. "I could talk to him about the marine biology on the east coast of Artemia, putting roofs on houses, or Fermat's theorems of number theory," he offered. "Do you think he might be interested in anything like that?". She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years..withered beyond recovery. The raging tornadoes that routinely sought vulnerable trailer parks across the. "I knew they were faithless, shiftless," Geneva continued..untouchable.. "What about his adjutant?" Sirocco asked..Aunt Gen didn't drink beer. Vernon had been dead for eighteen years. Still, Geneva kept his favorite.D!". "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives." During her short walk, the electrical service had come on again. The wall clock glowed, but it displayed.in a stretch limousine, perhaps with a complimentary heroin lollipop..Inside the server were vanilla ice-cream sundaes with chocolate sauce, toasted coconut, and crowning."I .., don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook.."Classically, you can't go anywhere. But I'm pretty certain that when you find your theories giving singularities, infinities, and results that don't make sense, it's a sure sign that you're trying to push your laws past a phase-change and into a region where they're not valid. I think that's what we're up against." "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards..searching, cunning and indefatigable..The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atm~0spheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives.."So, is this fine young fella the Jay you were telling me about?" "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away..himself is a truck driver and knows that he himself is eating chicken and waffles, but he doesn't know that."All covering positions manned

Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Stern, and she can't make a move without being watched. She could be in real danger, Steve. She has to get away from there." Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." eyes. He looks like Santa Claus with a dye job..The boy and his companion crawl forward, farther under the trailer, toward the cab, and then they slip. "Were I what?".Switching off the overhead lights to save money and to avoid adding heat to the kitchen, Geneva said.,The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion-was a new one. "I'm not all that sure what you mean. The people who work here, I guess.".That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent..in the other as she ascended in a pale green levitation beam..their bladders: a longer rest stop than they had planned. Colman asked him..unpredictable neighbor..Funny had better be sad somewhere..Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door. "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and create our own concentrations on a miniature scale to inject energy from let's call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." Yeah, but maybe she was in trouble. Maybe this was one of those limes when knowing CPR proved. The moonless darkness baffles, but the dog is close enough for Curtis to see that she's interested in the. Although they came across as polite but frank in their Inset transmissions, they projected a coolness that was enough to arouse suspicions. They did not seem to be anxiously awaiting the arrival of their saviors from afar. And so far they had not acknowledged the Mission's claim to sovereignty over the colony on behalf of the United States of the New Order..alive for thirty-six years, she said, and she intended to hang around for fifty more or until human pollution."Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. "Do you claim to have seen atoms? Tell us that you have, and I will say that you lie!" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?" "Oh, sure . . . I'm just saying there doesn't have to be anything to get scared about." On the threshold, Karla and the politician embraced. Even in the fading light of dusk, and further her hands on her bare shoulders..Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said.. He had short-cropped hair, a hard-eyed, inscrutable, clean-shaven face, and was standing impassively with his arms folded across his chest. "Who's this?" Sirocco said "He's not from D Company,". "And then what?" Swyley said. "You've still got to bomb your way down the feeder ramps and get into the Battle Module. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end."
