"There, among the windy peaks, is the cave of the North Wind. Even higher, on the highest and windiest peak, is the second fragment of the mirror. It is a long, dangerous, and treacherous climb. Shall I expect you back for breakfast?".. "I just want to point out that instead of an expedition, we are now a colony. Not in the usual sense of planning to stay here forever, but all our planning will have to be geared to that fiction. What we're faced with is not a simple matter of stretching supplies until rescue comes. Stopgap measures are not likely to do us much good. Hie answers that will save us are the long-term ones, the sort of answers a colony would be looking for. All the fuel, coolant, primary and standby power, hydraulic, pneumatic, gas, oil, life-support, and instrumentation subsystems servicing the Drive Section were performing well within limits. Way back near the tail, the banks of gigantic fusion reactors were gobbling up the 35 million tons of hydrogen that had been magnetically ram scooped out of space throughout the twenty-year voyage and converting over two tons of its mass into energy every second to produce the awesome, 1.5-mile-diameter blast of radiation and reaction products that would have to burn for six months to slow the 140-million-ton mass of the Mayflower II down from its free-cruise velocity..as predictable as its subject matter is unpredictable. There were no signs of a struggle, no signs of forced entry?but then, my BankAmericard hadn't left any signs either. The window was open, letting in the muffled roar of traffic on the Boulevard.
