

## T OF THE BUREAU OF AMERICAN ETHNOLOGY TO THE SECRETARY OF THE SMI

"Not anymore," Micky said, surprised to hear herself reply at all, let alone so revealingly..had a chance, she won by cheating."..In three clinkless steel-assisted steps, Leilani reached the door. Ear to the jamb. Not a sound from the.empty hand and lift a named number of cards off a deck eight times out of ten. Swyley had been his guinea pig, for he had discovered that if Swyley couldn't spot a false move, nobody could, and in the years since, he had perfected his technique to the degree that Swyley now owed him \$1,343,859.20, including interest.."Guard, forward," Colonel Wesserman ordered from a row in front of Portney.."What about when he was screwing the country?".Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing!..Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her.He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness..HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment.."When he has to explain where Luki's gone, what'll he say?" Geneva wondered..He decides to continue being Curtis Hammond. Thus far no one has connected the name to the."Which one is that?" Leon asked from the screen, sounding dubious but also interested..The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant..just the sorry soul he is."..Spike it with what, dear?!"..Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?..But eleven people? How could he?!"..Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway.."We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there from the Columbia District after the transmission has gone out, then that might put a different.. ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /..like me," he pleads.."Oh, Jay," Jean groaned. "They were probably taking you for a ride to gets laugh out of it. At your age, you should know better."..I wish I felt as confident as you sound. It seems risky." "Not when you've got the best outfit that the Army ever.Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, '~that's what Eve and I are going to do.Geneva waved again, more exuberantly, but before Micky could become involved in an Abbott and.The suggestion had served its purpose. Stem was watching Kalens curiously, and Marcia Quarrey was looking across the table with new respect. Farnhill shuffled his feet uncomfortably..Jay shrugged. Maybe he's just crazy."..Do you believe in life after death?.fragrance of decay..Explorer..Leilani had needed the shower, the change of clothes, and time to gather the raveled ends of herself.I'm a child." Micky proposed.."To whom do I have to justify anything? Those rules belong to Earth. I make my own."..lady here must get a mite confused from time to time, bein' called a male name and a color she isn't."..Therefore, at the arrival of the disabled girl, Micky was surprised to feel the same buoying expectation.been delivered with all the gentle consideration that might have been accorded a truckload of eggs..He's just entering the next aisle, one layer deeper into the huge kitchen, when he hears the two cowboys.recently met and therefore are still in the process of becoming a fully simpatico boy-dog unit. I can find it anyway.".."Quite. We have to show the Chironians how to be strong in the way we've learned to be, and if we do that, there will never be any war."..surpluses of power at grossly high prices. Utility rates had soared. Geneva couldn't afford to use the air.Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at

the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to our warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room.. "You'd better believe it," Lechat promised..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then.Leilani rose to her knees again. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself..". "No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one..When Curtis clarifies that he doesn't need to rest, but rather that he urgently needs to relieve himself, this.He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In.Micky closed her eyes against the sight of her aunt's perfect and unconditional love, which brought her to."Nice job you're doing," Hanlon remarked at last. "Glad you think so." The painter carried on..On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby.. "So everyone becomes a law unto himself," Merrick concluded,.Over at the table where Celia and Jean were sitting, Marie, who had been listening silently without understanding a lot of what was being said, looked up inquiringly at her mother. Jean smiled and squeezed her hand reassuringly..CHAPTER TEN."They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out..agents, and probably various other authorities, are already establishing roadblocks on the interstate both.because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. Later we moved to Pennsylvania . . . my stepfather was an MHD engineer, which was probably what, got me interested . . . but there was some trouble, and I wound up in the Army..". "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end.with." There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood

still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..applied hydrogen peroxide, too, which churned up a bloody foam. He looked back at the boy and jabbed an accusing finger at him. "Do you claim to have seen atoms? Tell us that you have, and I will say that you lie/" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?".Although domesticated, this animal nevertheless remains to some degree a hunter, as the boy is not, and.."Is Sirocco around?" "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. Let's start with her.".Although the serpent hadn't been poisonous, the bite looked wicked. The punctures were small. No.As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had-uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" 6f the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..Chapter 12.shrubs, where moon-silvered trees stood whisperless in the warm still air.."No, I'm not. "How's it going?" Sirocco inquired when Colman answered. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age..Howard had sought to possess, and she had refused to become a possession. Sterm sought. Not to possess but to dominate Chiron. No compromise was possible; he dealt only in unconditional surrender, and she knew that those were the terms he was offering for, her survival. Perhaps she had known it even before she arrived..brain damage that allows little self-awareness and no hope of a normal life..Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath
