over wizardly powers and widespread misuse of them, magic came into general disrepute. But when the lore-books of a wizard came into a warlord's hands he was likely to treat them with distaste to us, but which may be seen as quite legitimate and even desirable by its own. "First we must settle the matter that divides us," said the Windkey. "do that, sir, I'll do your things with mine," she said. "I wasn't coming back, he thought, his last words in Hardic, his last grief, for he was in the." "Yes. To send away one woman, it takes nine mages." He very seldom smiled, and when he did it was quick and fierce. "We are to meet to uphold the Rule of Roke. And so to choose an Archmage." "Of course," Golden said, pleased with his son's caution. She sat on the stone floor near the crucible, her thin body grayish and dark like the stones. Her chin and breasts were shiny with the spittle that ran from her mouth. He thought of the spring of water that had run from the broken earth. Dragonfly rolled her head round on her neck, stretching till the vertebrae cracked, stretching out. made sentences, only lists. Long, long lists. Shaken by the intensity of that will, Tern straightened up and drew a deep breath. He looked round at the girl, Dory. She did not return his gaze, watching her mother with stolid, sullen grief. Only after the woman sank into sleep did Dory move, going to help Rush, who as a friend and neighbor had made herself useful and was gathering up blood-soaked cloths scattered by the bed. Azver nodded, in silence. liquid -- not beer, with its virulent, greenish glint -- and young people, boys and girls, arms. "Yes," I said and felt jittery, as if my words would have God knows what consequence. "I." "And a good thing too!" Golden said roundly. "What's become of that daughter of hers, then? Went off with a juggler, I heard?" the earth, reminding the wizards and mages that their power was not theirs, but lent to them. how sweet life was. He had bought the Reche grove, at a very stiff price to be sure, but at least. It may be that Segoy is or was one of the Old Powers of the Earth. It may be that Segoy is a name. But he made no spell. He had no magic left in him. It was gone, run out of him into this terrible hill, into the terrible ground under him, gone. He was no wizard, only a man like the others, powerless. Listen, what is this Cavut? Very few people ever spoke to Gelluk unless he compelled them to. The spells by which he silenced. The weather was fair for once: a following wind, a blue sky lively with little white clouds, the mild sunlight of late spring. They made good way from Geath. "It can do it by itself," Diamond said, and held out the fife away from his lips. His fingers danced on the stops, and the fife played a short jig. It hit several false notes and squealed on the last high note. "I haven't got it right yet," Diamond said, vexed and embarrassed. in their midst. The one nearest me -- I saw stupid eyes, whites shining, and trembling lips -- obey, your majesty." He summoned his wizards, and the mage Early came, bowing low. And now he. future, his own life, his whole life, in his arms. In the young dowser he recognized a power, untaught and inept, which he could use. He needed much more quicksilver than he had, therefore he needed a finder. Finding was a base skill. Gelluk had never practiced it, but he could see that the young fellow had the gift. He would do well to learn the boy's true name so that he could be sure of controlling him. He sighed at the thought of the time he must waste teaching the boy what he was good for. And after that the ore must still be dug out of the earth and the metal refined. As always, Gelluk's mind leapt across obstacles and delays to the wonderful mysteries at the end of them. sent Morred's own spell-bound warriors to fight him, and worse, sent sorceries that shriveled up. "I'll get the water," Tern said. He took the basin and went out to the courtyard, to the well. Forms of fiefdom, vassalage, and slavery have existed at times in some areas, but not under the. He was so distraught that when he made up his mind to call Silence he could not think of the opening of the spell, which he had known for sixty years; then when he thought he had it, he began to speak a Summoning instead, and the spell had begun to work before he realised what he was doing and stopped and undid it word by word. "What can we do?" said Veil. They walked a half-mile or so. The Knoll rose up full in the western sun on their right. Behind them the School sprawled grey and many-roofed on its lower hill. The grove of trees towered before them now. She saw oak and willow, chestnut and ash, and tall evergreens. From the dense, sun-shot darkness of the trees a stream ran out, green-banked, with many brown trodden places where cattle and sheep went down to drink or to cross over. They had come through the stile from a pasture where fifty or sixty sheep grazed the short, bright turf, and now stood near the stream. That house," said the mage, pointing to a low,

moss-ridden roof half-hidden by the afternoon shadows of the trees. "Stay tonight. You will?" "What have you got there?" which went in various directions, passed one another, lifted, and seemed to merge by tricks of "Irian," he said, "do you hear the leaves?" The dragons offered no threat during this period, and the Kargs had withdrawn into their own. They keep complex accounts and records in weavings of different colors and weights of yarn, and employed any kind of symbolic writing, and that sparingly. Through love, respect, and trust, Dragonfly would never disregard a warning from Rose; but she was unable to see Ivory as perilous. She didn't understand him, but the idea of fearing him, him personally, was not one she could keep in mind. She tried to be respectful, but it was impossible. She thought he was clever and quite handsome, but she didn't think much about him, except for what he could tell her. He knew what she wanted to know and little by little he told it to her, and then it was not really what she had wanted to know, but she wanted to know more. He was patient with her, and she was grateful to him for his patience, knowing he was much quicker than she. Sometimes he smiled at her ignorance, but he never sneered at it or reproved it. Like the witch, he liked to answer a question with a question; but the answers to Rose's questions were always something she'd always known, while the answers to his questions were things she had never imagined and found startling, unwelcome, even painful, altering all her beliefs.. After a long pause he went on. "You know that a dragon brought back our Lord Sparrowhawk, with the young king, from the shores of death. Then the dragon carried Sparrowhawk away to his home, for his power was gone, he was not a mage. So presently the Masters of Roke met to choose a new Archmage, here, in the Grove, as always. But not as always.. "I said you have a strength in you, a great one," the witch said from the darkness. This speech, innate to dragons, can be learned by human beings. Some few people are born with an untaught knowledge of at least some words of the Language of the Making. The teaching of it is the heart of the teaching of magic.. Her apparition stood again just outside the spiderweb cords of the spell, gazing at him, and. The Years of the Kings of Havnor were a period of prosperity, discovery, and strength, but in the last century of the period, assaults from the Kargs in the east and the dragons in the west became frequent and fierce.. Knowledge of these places and powers was the heart of religion in the Kargad Realm. In the Archipelago, the lore of the Old Powers was still part of the profound, common basis of thought and reverence. On all the islands, the arts mostly practiced by witches, such as midwifery, healing, animal husbandry, dousing, mining and metallurgy, planting and growing spells, love spells, and so on, often invoked or drew upon the Old Powers. But the learned wizards of Roke had generally come to distrust the ancient practices and made no appeal to the "Powers of the Mother." Only in Paln did wizards combine the two practices, in the arcane, esoteric, and reputedly dangerous Pelnish Lore.. Hemlock was 10th to practice any of the lesser arts of magic. He did not put out a finding spell, as any sorcerer might have done. Nor did he call to Diamond in any way. He was angry; perhaps he was hurt. He had thought well of the boy, and offered to write the Summoner about him, and then at the first test of character Diamond had broken. "Glass," the wizard muttered. At least this weakness proved he was not dangerous. Some talents were best not left to run wild, but there was no harm in this fellow, no malice. No ambition. "No spine," said Hemlock to the silence of the house. "Let him crawl home to his mother." have great gifts?". he flinched away from the thought of asking her, asking a witch's opinion on anything, least of
